War Summary of The Latest Events

Peronne, and all the roads leading out of it, are now dominated by French guns. General Foch's mid-night report shows that on the north side of the river—where the Germans until Wednesday held positions from which the French advance along the south bank could be entailed by artillery fire—our Allies spent a very strenuous and a very successful day driving the enemy in towards Peronne. The splendid infantry of France first carried the southern slope of a small hill north of the village of Curlu, on the river bank. Pushing east they assailed the German second line positions on the ridges along the river and as far north as the main road from Peronne to Albert, a distance of two thousand yards. These positions General Foch states were completely carried. "Pressing forward to the east," he continues, "we attacked the village of Hem, which fell into our hands after heavy fighting, as well as the farm of Monaca. During these actions 300 German soldiers and three officers were made prisoners." The result of the day's advance is that on the north side of the Somme the French are now some 7,500 yards from Peronne, and have protected their forces which are advancing on the south side of the river from the possibility of serious damage at the hands of the German gunners.

South of the Somme, it is officially announced that on a front of six and one-quarter miles all the German second line positions are now in the hands of the French. On the southern river bank the army of Gen. Foch rests its left on the Sormont Farm, which is scarcely 5,000 yards from the main street of Peronne. The right wing of the advance south of the river had some hard fighting to do before it secured the ground won. The Germans brought up heavy reinforcements and counter-attacked at Belloy. They were beaten off. They held a mill on the northern outskirts of Estrees, and after a vigorous action what was left of the garrison—some 200 men—surrendered. They clung to the communication trench between Belloy and Estrees but were cleaned out.

Two immensely strong defensive lines—consisting of many rows of trenches, strong earthworks, concreted machine gun shelters, artillery emplacements and subterranean quarters for the troops—which have taken almost two years to construct and perfect to the satisfaction of the German engineers, have been carried by

The farmers are very busy with the hay crop, which is very heavy.

We had a very severe electric storm here Sunday afternoon, great excitement prevailed over the burning of Mr. Guy Simmons barn struck by the lightning. Fortunately they were at home and by prompt action saved the horses. His loss is heavy as most of his machinery was in and his lumber wagon, two lumber sleighs, many other pieces of machinery such as a prosperous farmer would have. His loss is heavy. A nice Insurance which will cover some of the great loss. Mr. Simmons' many friends gathered very quickly in spite of the pouring rain.

This is straw-berry season here, berries galore. Some lovely gardens in this vicinity.

A number of people from here attended the Free Methodist Camp Meeting held at Verona on Sunday last.

Mr. and Mrs. Anson Guess of Sydenham, spent the week-end at Mr. Earl Burt's.

Mrs. Topping of Elgin, is visiting her parents, Mr. and Mrs. James Wallace.

Mrs. Birdsall, Chicago, is visiting her brother, Mr. Harvey Mills.

Mrs. Roy Gallagher is daily expected to arrive from the west to spend a few months with her parents, Mr. and Mrs. Harvey Mills.

Mr. M. G. Storms and little Miss Edith Shibley left on Thursday for Rutherford, New Jersey, to visit friends there. Little Edith will remain there with her parents, who have gone to make it their home.

R. N. Lapum left on Thursday for New York State.

Mrs. (Rev.) White entertained a few of her friends on Friday evening at tea.

A new car is soon to arrive for a prominent resident here.

Mr. and Mrs. J. Comieters of Kingston, are spending a few days at M. G. Storms.

Mr. and Mrs. Sperry Shibley have returned to the farm for the summer.

Mrs. B. B. Shibley has returned to her home after spending the winter with her daughter, Mrs. K. N. Stoems

for the troops—which have been taken almost two years to construct and perfect to the satisfaction of the German engineers, have been carried by the French on an eight-mile front in five days of steady fighting. It is a wonderful bit of work. Only one more prepared position, consisting of a triple line of trenches, confronts General Foch's army, and then it will be out in the open country east of the Somme, where the Germans will have to face it in hastily-constructed trenches, with no dug-outs forty feet down in the earth to shelter them from the pounding of the big guns.

Sir Douglas Haig's report of the operations on the British front north of the Somme is brief. No special incident of importance occurred. The fighting was continuous all along the front. The British lost no ground gained, and advanced slightly in certain sectors. The German casualties were heavy, and many more prisoners were taken. The total captured on the British front in the past five days is now over 6900. The French have taken about 10,000, so that the "bag" begins to assume respectable proportions. All the despatches describing general conditions say that the Germans are putting up a far more powerful resistance to the British than the French advance, and are counter-attacking with very large forces, in the belief that the real danger on this front is to be feared from the British front. It is asserted that in the hope of relieving the pressure on the southern end of the British front the Germans are organizing a powerful offensive between Arras and the Belgian frontier. What the British are concealing behind the Vimy Ridge is likely to prove a surprise to the Teutons.

It is announced by the Russian War Office that General Letchitzky's troops have cut the railway which, passing through Delatyn, crosses the Carpathians and connects Galicia with Hungary. No details of the action are available. The bulletin sent out states that the Austrians were routed on the right bank of the Dniester, doubtless near Tlumach, where a sanguinary struggle has been in progress for several days.

The Russians are employing cavalry on a large scale in their advance towards Lemberg from the southeast. An Austrian official report, evidently sent out before the decisive struggle east of Stanislaw recorded in the preceding paragraph, announces that near Tlumach a mass of Russian cavalry six ranks deep along a front of over three thousand yards attacked the Austrian troops of von Bothmer's army. The Russian horsemen were dispersed, it is stated, suffering heavy losses. The significance of this item is that it marks the end of position warfare for the time in the Galician sphere of operations. The throwing of ten thousand horsemen in a mass against a strongly fortified position, consisting of several lines of trenches and earthworks, is not a practicable thing, and it must, therefore, be supposed that von Bothmer's troops were out in the open when attacked.

The Austrians claim a success on the Upper Styr, where at Vereben 11 Russian officers and 839 men are reported to have been captured during an action in which the Russians were the aggressors, but were repulsed. Vienna says that during June south of the Pripet marshes 158 Russian

GERMANS ESCAPE FROM KINGSTON

Kingston, Ont., July 4th—Partic-
ulars of a sensational getaway made
by three Germans from the interment
camp at Fort Henry yesterday were
just made public to-day. It appears
that the three Germans were "trust-
ies," and were given a job of fixing
a gasoline boat owned by one of the
officers at the fort. A military police-
man had the three under his charge,
and went with them on a trial spin
in Navy Bay. To prevent an escape
they were only given a limited amount
of gasoline, but they secretly procur-
ed an extra supply of gasoline from
torches or elsewhere and hid it in the
boat. When they had gone out from
Navy Bay the policeman became sus-
picious and told the men that they
had better turn back. The men had
told the policeman that they had spe-
cial permission from Commandant
Major P. C. C. Campbell, to take a
long cruise. The policeman com-
manded the men to return. Instead
of doing this they seized the officer,
tied him up securely and laid him in
the back of the boat.

HEAD FOR ISLAND

Then the men poured the extra gaso-
line into the engine and headed the
launch for the foot of Wolfe Island.
When they reached the foot of the
island they headed up the American
channel and stopped their boat about
two miles east of Cape Vincent. Here
they landed and started for the in-
land country. They left the officer
in the boat and he was later found
by some people who happened to be
passing. At once he got in commun-
ication with Major Campbell and
afterwards tried to find the men. He
was unsuccessful, and so far no trace
of them has been found. It is the
opinion of the commandant of the
interment camp that the men are
now in some nearby New York state
village. Every effort is being made
to find them, and it is thought that
they will be captured shortly. If
they are found on the soil of the
United States there may be a very
interesting legal battle for their ex-
tradition. They can be held on the
charge of theft, and it may be that
the case will be fought out in the
United States courts if the men are
caught.

WOULD HAVE GONE THRU HELL ITSELF

London, July 4th—Convoys of the
wounded continue to arrive at differ-

---the ideal car ---at the ideal price

Things that were impossible yester-
day are to-day's accomplished facts.

Somewhere in the world someone
with special knowledge, special expe-
rience, special equipment gets ready
and then startles the world by accom-
plishing the seemingly impossible.

Almost everyone said that a com-
plete automobile of beautiful design,
fine finish, the ideal small, light, eco-
nomical car, built with quality mater-
ials and absolutely completely equip-
ped, could not be built to sell for
\$850.

And but for Overland special know-
ledge, special experience and special
equipment, it probably would still be
one of the impossibilities instead of
an accomplished fact.

Probably no other organization in
the world can produce the quality
and efficiency equal to this car to sell
at anywhere near so low a price.

Certain it is that no other organiza-
tion is doing so.

And no other car ever produced
seems so exactly to suit the require-
ments of so varied a lot of people.

People of wealth, people of modest
means—

People of long automobile experi-
ence—

People who never before owned a
car—

All find in the small, light \$850
Overland their ideal car.

It has the beauty, comforts, con-
veniences, power, and complete equip-
ment which everyone wants.

Yet it is inexpensive to buy and
economical to operate.

See the Overland dealer and get ac-
quainted with this car.

But act now, as this car stands
alone and the rush to own them is
amazing—delayed action is almost
sure to mean a long wait for deliv-
ery.

sistent with quality, at
S'Drug Store Limited.

London, July 4th—Convoys of the
wounded continue to arrive at differ-
ent ports, where everybody comments
upon their cheerfulness and high
spirits and their supreme confidence
that the tide of battle has turned.
Some tell thrilling stories. One well-
known commanding officer of a bat-
talion, who was landed at Southamp-
ton with a hole through one hand
and an ugly shrapnel wound in the
leg, which he received in Saturday's
fighting, said:

"Our fellows reached their objec-
tive. They would have got there if
hell itself had to be crossed. No sol-
diers could have been finer than our
men. The German machine guns were
sweeping that portion of the front
with an absolute hail of lead, but
our only trouble was to prevent them
from charging right into the thick of
it before the chosen moment.

"The officers were splendid—all of
them. Lieutenant Chawner, in the
teeth of a tornado of fire, dashed
across No Man's Land at the head of
his platoon. Not one got thru but
himself. But he found himself face to
face with three Germans, whom he
promptly threatened with his revol-
ver and made them lay down their
rifles. He took them prisoner and
ordered them back to our lines. Just
then he was knocked over by a shell
fragment, with one of the Germans.
When he recovered consciousness one
of the other two Germans was ban-
daging him; the second had vanish-
ed. So Chawner thanked him and
marched him back to our lines.

"Our men marched thru that rag-
ing fire exactly as if on parade. If
they had been soldiers all their lives
they could not possibly have shown
a finer fighting spirit. My battalion,
being in one of the bad bits, suffered
terribly, but those who fell fell
fighting like heroes."

WEDNESDAY.

Guelph City Council decided to re-
vert to standard time on Friday
night.

Heavy German attacks in the vil-
lage of Fleury were repulsed by the
French.

Belleville citizens decided that an-
other battalion could be raised in
that city.

Little Jack Ward of Mimico died
of injuries received when a heavy
pipe fell on him.

Several Austrian submarines are
reported to have been trapped by
Italian steel nets.

His Royal Highness the Duke of
Connaught reviewed the artillery di-
vision at Petawawa.

South Perth Liberals nominated
Peter Smith, Township Clerk of Dow-
rie, for the Legislature.

Lillian Smith, aged thirteen,
daughter of a soldier now in France,
was drowned in a canoeing accident
at Peterboro.

Mrs. Louis O. Breithaupt, formerly
Miss Mabel White of Milton, died
suddenly after a few hours' illness at
her home in Berlin.

The body of Mrs. Herbert Hall,
wife of a prosperous farmer near
Newmarket, was found in the cistern
of their home yesterday.

John Weatherall, more than 70
years of age, died following a blow
on the head with a cane inflicted by
another inmate of the Huron House
of Refuge at Clinton.

Alfred Nunn, a market gardener,
just outside St. Thomas, was jolted
off his wagon going down a hill, and
the wheels passed over him, fractur-
ing his skull, causing his death.

Confident that Congress soon will
be confronted with information that
will force a break with Mexico,
House leaders yesterday began work
on resolutions which would authorize
the President to prosecute a vigor-
ous war.

THURSDAY.

The town of Medina has been oc-
cupied by the Arab tribesmen.

Sir Roger Casement submitted a
long statement in self-defence at his
trial in London.

Hon. Rupert Guinness is in the Do-
minion on a mission to raise 5,000
men in Canada for the British navy.

Germany has presented to Switzer-
land a demand for an exchange of
commodities, which is virtually an
ultimatum.

Mrs. Vincent Collett, Port Hope,
died of shock after receiving news on
Friday last of her husband having
been killed in action.

John Gorman of Richmond Hill
was killed on Yonge street by an au-
tomobile owned and driven by A. W.
Godson of 85 Ontario street, Toronto.

Governor-General von Bissing at
Brussels has issued an official denial
of reports circulated abroad that the
German Government intends calling

tributed \$20,000 for patriotic pur-
poses in a two-days' campaign.

James Torrance, ex-M.P.P. for
North Perth, was sworn in as Col-
lector of Customs at Stratford.

Five returned soldiers were injur-
ed, one of them seriously, when their
car turned turtle on the Kingston
road.

Captain Hans Tauscher was found
not guilty of complicity in the Ger-
man plot to blow up the Welland
Canal.

An eighteen-months-old child of
Mr. and Mrs. Hoy, of Grey Township,
was drowned in a watering tank in
his father's barnyard.

Northumberland county branch of
the Dominion Alliance decided to di-
vide, organizing separately for East
and West Northumberland.

Alberta is dry to-day, making the
three Prairie Provinces now barless,
and only Saskatchewan having liquor
stores, operated by the Government.

Dr. Thomas W. Vandon, an ex-
Mayor of Galt, and prominent in var-
ious activities there, was stricken
with heart failure while playing golf.
He was seventy-three years of age.

Captain James Hahn of Stratford,
about whose appointment to the
Canadian Intelligence Staff head-
quarters in France there was criticism
on account of his nationality,
has been decorated by the King at
Buckingham Palace with the Milit-
ary Cross, being twice mentioned in
despatches by Sir John French for
gallantry.

MONDAY.

Dominion Day was celebrated in
England by the King reviewing the
Canadian division at Hakeley Com-
mon, Surrey.

Announcement was made Saturday
night that a fleet of British aero-
planes had bombarded the railway
station at Lille.

West Huntingdon cheese factory
was destroyed Friday night by fire of
unknown origin. It was a frame
building, erected about fifty years
ago.

The most severe hailstorm in many
years passed over Orillia between 1
and 2 o'clock yesterday. Rain fell
in torrents, accompanied by a great
electrical display.

The War Office announced that the
necessary passenger traffic between
Great Britain and the Continent
would be regulated closely and re-
duced as far as possible.

Herbert L. Glover, aged twenty-
one, was drowned in the Humber
River near Toronto last night. He
was a son of William Joseph Glover
of Bernice Crescent, Lambton Mills.

The morning papers predict that
Harold J. Tennant, Parliamentary
Under-Secretary for War, will be ap-
pointed to succeed the Earl of Sel-
borne as President of the Board of
Agriculture.

The roof of the boiler house of
Kreiner & Co.'s furniture factory in
Berlin was discovered ablaze Satur-
day morning at 2 o'clock, but the
speedy arrival of the firemen pre-
vented the fire from spreading to the
main building.

Prussels has issued an official denial of reports circulated abroad that the German Government intends calling the Belgians for military service.

The Minister of Finance conferred with representatives of the Canadian Bankers' Association regarding another large credit to the Imperial Government, possibly of \$50,000,000.

"Kitchener" is the new name chosen by the electors of Berlin, Ont. The City Council has still to pass a by-law, which will then require the sanction of the Lieut.-Governor in Council.

The Canadian Hospitals Commission has been organized as a branch of the Canadian Expeditionary Forces to secure more strict military control of military hospitals and convalescent homes.

Dr. Karl Liebknecht, the German Socialist leader, was sentenced to thirty months' penal servitude and dismissal from the army for attempted high treason, gross insubordination, and resistance to the authorities.

FRIDAY.

Port Hope's new \$30,000 hospital was formally opened yesterday.

Premier Asquith denied that any amnesty had been promised to Irish rebels.

Sir Roger Casement was found guilty yesterday of high treason and sentenced to be hanged.

The only munitions factory in Roumania was reported destroyed yesterday by German and Bulgarian agents.

Mrs. Guillot, M. Jobin and his sixteen-year-old son were drowned out of a canoe near Ste. Catherine, Quebec, yesterday.

The Ontario Government may appoint a commission to regulate motorists, so numerous are the complaints of careless and reckless driving.

The first year's electric operation of the London & Port Stanley Railway shows a satisfactory surplus over fixed charges and operating expenses.

The Minister of Finance announces a further credit by Canadian banks of \$25,000,000 for the purchase of war munitions by the Imperial Munitions Board.

Committees composed of members of the House of Commons and members of the Associated Chambers of Commerce in Great Britain are to hold a conference with a view to establishing a Ministry of Commerce.

One of the bandits who dynamited the Quebec Bank Branch at Ville Marie, Que., and burnt it to the ground, has been taken in a hand-to-hand fight at Sutton Bay, and died last night at New Liskeard Hospital without revealing his identity.

Thomas Kelly, contractor for the Manitoba Parliament Buildings, was found guilty of theft of money, property, etc., to the value of about \$1,250,000, of receiving property knowing it to be obtained by false pretences, and of obtaining by false pretences. Sentence was reserved.

SATURDAY.

Lord Kitchener left an estate estimated at about \$850,000.

Dougal McNaughton, a Harwich farmer, hanged himself in a fit of despondency.

Edward Meredith, a Mimico Asylum guard, has been dismissed for abuse of an escaped patient.

Halifax is now under the operation of the prohibition act passed at the last session of the Legislature.

The citizens of Collingwood con-

at 7.30 o'clock, but the speedy arrival of the firemen prevented the fire from spreading to the main building.

TUESDAY.

The Entente Allies have raised the blockade against Greece.

Troops from Niagara Camp have begun to move to Camp Borden.

Mrs. Hetty Green, the world's wealthiest woman, died in New York.

The United Irish League accepted Lloyd George's proposals of settlement.

Few smallpox cases are reported in Ontario and the measles epidemic is lessening.

Dr. S. E. Charlton was elected by acclamation to the vacant seat in Galt City Council.

Dr. M. C. Dennis, a recent veterinary graduate, was killed in an automobile accident near Tottenham.

Berlin City Council, by 13 to 3, carried the by-law to change the name of the city to "Kitchener."

James Goring, a farmer near Alexander, Man., has 72 acres of wheat, 30 inches tall and full headed out.

The British Royal Commission on the Irish uprising laid the blame upon the Chief Secretary, Mr. Augustine Birrell.

F. Wellington Hay, Liberal, and John A. Makins, Conservative, were nominated for the North Perth seat in the Legislature.

An ammonia tank in the Athelma Apartments in Toronto burst, but no one suffered seriously from the fumes, as the windows were open.

For neglecting to attach a two-cent war stamp to a box of toothpaste he sold, a Montreal druggist was fined \$50 and costs or a month in jail.

Brantford City Council, by a vote of 8 to 7, decided not to revert to standard time now, but to do so on August 31, the same day as Hamilton, instead of September 15.

Tony Legato, an Italian who was found guilty of the shooting at Guelph of a compatriot, George Viorini, after the latter had slapped his face, will hang on July 5. The Cabinet Council has decided not to interfere in the case.

Greece Again Yields to Allies.

ATHENS, July 4.—The National Bank of Greece has authorized an increase in its paper currency of 50,000,000 drachmae, without further gold cover than exists at present. The Government has again yielded to the demands of the Allies, and has agreed that the complete demobilization of the army will be effected by the end of July.

Drives Him to Drink.

"I'm so sorry about it, but my husband actually hates music."

"How strange!"

"Isn't it? His prejudice is so strong that he has to jump up and leave the theater whenever the orchestra is playing an entr'acte."

Rust.

Nothing can rust unless it has iron in it. Rust is made by iron touching moist air. The oxygen in the moist air acts on the iron and forms what we call "oxide of iron," or rust, which crumbles away and spoils the iron.

GET IT AT
WALLACE'S

at 7.30 o'clock, but the French, British troops en into the German fort of defences on a front of

"The French attack on late right is proceeding effectively."

"Heavy fighting continues between the Rivers S. Ancre, and north of Amecourt, inclusive. The whole of this front still with intensity."

"On the right of our have captured a German trenches on a front of a depth of 1,000 yards, stormed and occupied the fortified villages of Mon Mametz."

"In the centre of our front of four miles we have many strong points, while the enemy is still holding the struggle on this front severe."

"North of the Ancre valley, Amecourt, inclusive, the equally violent, and in have been unable to retake of the ground gained in tacks, while other portions our possession."

"Up to the present we have sand German prisoners through our collecting stations, including two regimental and the whole of one staff."

"Yesterday, in spite of wind, a large amount of work was done in the important railway depot with powerful bombs. A number of other bombs were depots, railway junctions trenches, and other points importance in the enemy."

"Considerable aerial activity occurred to-day during the full details have not yet been. Our machines attacked train on the line between Cambrai. One of our ascended to below 900 feet, succeeded in dropping a bomb which exploded. Other the whole train in flames further explosions."

Sunday night's report

"Heavy fighting has taken to-day in the area between and the Somme, especially court nd La Boisselle."

"Fricourt was captured troops about 2 p.m., and our hands, and some prisoners made east of the village."

"In the neighborhood of the enemy is offering resistance, but our troops satisfactory progress. A large quantity of war material fallen into our hands, but not available."

"On either side of the Ancre the situation is

A Good Judge.

"I take great pride in my judge human nature," said Quentin. "A few months' friend have \$10, and I was at the time he would not part and he didn't."

It is ever true that he is nothing for others does himself.—Goethe.

Men are born to be service another; therefore reform them bear with it.

IT PAYS TO VACCINATE.

All government tests prove without doubt that it surely pays every farmer to vaccinate. Fresh vaccine "in sealed tubes" as recommended and used by the government. For sale at WALLACE'S DRUG STORE LIMITED

CHARGED STEEL HOLES.

Returned Soldier Tells How Infantry
Advanced on Enemy.

LONDON, July 4.—A wounded
man straight from the western front
gave the following account of the in-
fantry fighting:

"Everything possible seemed to
have been thought of beforehand, and
for weeks we have been having re-
hearsals of every movement. We
were all ready for the charge by six
o'clock, but the artillery, which had
been pounding all night, continued
the argument for an hour. Then bom-
bardment slackened and our pulses
quickened as we realized our moment
was at hand.

"We did not literally charge the
enemy's advanced trenches. There
was nothing to charge. What we did
charge, however, and charge quickly,
were our own shell holes behind the
German trenches. They were huge
holes, where our shells had dropped
during the week, and in these holes
the Germans awaited us with ma-
chine guns. As we approached they
turned the guns on us.

"Some of our fellows carried
bombs and hurled them into the holes
as soon as they got within reasonable
range. But we did not finish them
all in that way. There did not hap-
pen to be a bomber handy every time
a machine gun sang out from a shell
hole, so our lads, instead of waiting
for someone with a bomb, just charg-
ed the holes. Often, with a whoop
on their lips, they took flying leaps
into the holes.

"It was a thrilling affair while it
lasted. A dozen or perhaps a score
of men would converge on a hole and
take a leap almost simultaneously.
The next moment the hole was filled
with a struggling mass of British and
German humanity while the guns, of
course, were silent."

DISTINCTLY BRITISH.

French Operations Take the Form of
a Supporting Movement.

LONDON, July 4.—The "big push"
talked of by military writers and
dreamed of by the men in the
trenches has come. Last night, after
12 hours of fighting such as the
country from the Aisne to the sea has
not seen since the Battle of the Yser,
the British had advanced from two
to six miles beyond the German ad-
vanced line, and the French had moved
up from one to two miles along a
combined front of approximately 35
miles.

The drive is distinctly a British
undertaking, the French operations
taking the form of a supporting
movement to make secure the British
right flank, which any considerable
advance would lay open to attack.
Britain has been preparing for it for
nine months. Nearly a million and a
half men are engaged in it, and an
inconceivable number of guns, large
and small, with enormous reserves of
ammunition of all kinds, have made
it possible.

Beginning at 6 o'clock Saturday
morning, the bombardment, which
had been incessant for five days from
Ypres to the Somme, was concentrat-
ed with unprecedented intensity on
the 20 miles from a point just above
Hebuterne to the River Somme. Bat-
tery after battery of all calibres joined
in a devastating fire that covered
every foot of ground from the Ger-

HOLD KEYS TO LEMBERG

Russian Advance Continues on
Galician Front.

Nearly Fifteen Thousand More Pris-
oners Have Been Captured, and
Advance on Lemberg is Proceed-
ing With Great Rapidity—Rus-
sians Are Aiming to Take Town
of Stanislaw.

LONDON, July 4.—The Russian
offensive continues to make progress
in Galicia. Petrograd claims the
capture of several towns south of
Kolomea, the important railway junc-
tion, which is the key to Lemberg. It
also reports the occupation of fortif-
ied posts in the foothills of the Car-
pathians following the repulse of an
Austrian counter-attack north-west
of Kimpolung. The capture of 14,-
574 more prisoners is recorded,
bringing the total number now up to
217,000.

Berlin claims that the battle in
progress west of Lutsk for the last
week is now developing favorably for
the Germans. The capture of Russian
positions on the Styr south-west of
Sogul is also claimed. Troops of Cos-
sacks already harassing the flank of
General von Bothmer's army have
been repulsed.

Semi-official reports from Vienna
deny indignantly the Russian claims
of the capture of 214,000 men and
great numbers of cannon. They point
out that had the losses been as Petro-
grad claims the Austrians would not
have a single man left on the Galician
front; death and wounds would have
accounted for the rest.

Instead, it is claimed that the Aus-
trian losses amounted to between 10
and 20 per cent. instead of the 25
per cent., which has been not an un-
usual figure in other operations of
the war.

The advance of the Russians from
Obertyn, which was captured Friday,
indicates that their plan is to cap-
ture the important town of Stanislaw,
about fifteen miles west and slightly
north of Thumacz, and well behind
the present Austro-German centre
front on the Strypa. The capture of
Stanislaw would mean that this army
must either retreat rapidly or be sur-
rounded when the Russians push
northward, cutting it off from its
supports in the rear.

The fierceness of the Russian at-
tacks near Thumacz indicate that
their objective is to force the retreat
or secure the capture of this army,
which has effectively barred the pro-
gress of the Russian forces fur-
ther north toward Lemberg.

Further Russian repulses in the
region of Lutsk, south-east of Kovel,
are reported in the official German
statement.

HURLED OVER PRECIPICE.

Turks Are Bayoneted by Russians in
Rear Attack.

PETROGRAD, July 4.—The Rus-
sian official of Sunday reports suc-
day reports successes on the Cau-
casus front. East of Plantana a
chain of mountains which had been
strongly fortified by the Turks was
captured in a brilliant attack.

el; milling, 90c to 95c per bushel.
Goose wheat—94c per bushel.
Barley—Feed, 60c per bushel; malting,
65c per bushel.
Oats—55c to 56c per bushel.
Buckwheat—Nominal.
Rye—According to sample, nominal.
Hay—Timothy, No. 1, \$18 to \$20 per
ton; mixed and clover, \$14 to \$16 per
ton.
Straw—Bundled, \$14 per ton; loose,
\$8.

WINNIPEG GRAIN MARKET.

WINNIPEG, July 3.—Winnipeg wheat
market closed today 1½c up for July, 1½c
for October and December.
Oats were from unchanged to ¼c low-
er. Flax gained ¼c in July and ½c in
December.

There was a big rush in the morning,
a little stir towards the close, but
otherwise the pit was very quiet.

The holiday in the American markets
had a quieting effect. The opening was
no surprise, in view of the rise on Sat-
urday, but Liverpool quotations came in
higher, and some very good buying de-
veloped. The shorts covered as quickly
as possible, but the export houses were
the real buyers, taking between two and
three million out of the local market,
some of it at the top prices of the
morning.

1,500 Enemy Dead.

PARIS, July 4.—An eyewitness of the drive in the Somme says:

"Two French regiments seized Dompierre, which bristled with blockhouses and machine-gun shelters. When the French reached the village it was a pile of smoking ruins. The French accounted for practically every German left alive in the course of furious hand-to-hand fighting.

"More than 1,500 German bodies lay on the shell-shattered ground, and 700 survivors gave themselves up.

"The slogan of the battle is General Petain's famous message to the defenders of Verdun: 'We will get 'em.'"

First Wounded Reach London.

LONDON, July 4.—The first batch of wounded from the British front in France arrived at Charing Cross station Sunday evening. An enormous crowd assembled at the station, and the police had considerable difficulty in securing passage for the Red Cross vehicles through the cheering, flag-waving people.

British Victory in East Africa.

LONDON, July 4.—Another victory for the British against the Germans in German East Africa was announced Saturday night in an official statement, as follows:

"General Northey, who has been operating east of the Livingstone Mountains against the Germans, has ejected them from the important Ubena centre and driven them northwards. General Northey has taken booty and prisoners and inflicted losses."

Wines Permitted.

PETROGRAD, July 4.—The prohibition bill passed by the Duma, which, on first analysis, was generally interpreted as embracing all kinds of alcoholic drinks, has now been found to contain an unpublished clause which makes an exception of wines not containing more than 12 per cent. of alcohol.

City of Nancy Shelled.

PARIS, July 4.—The city of Nancy was shelled by German long-range guns Friday night, it was officially announced yesterday.

Nancy is the capital of the French department of Murthe-et-Moselle, and lies 35 miles south of Metz.

Catarrhal Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition; hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Cure acts thru the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Cure. Circulars free. All Druggists, 75c.

F. J. CHENEY & CO., Toledo, O.

captured in a brilliant attack. The Russians also drove the enemy beyond the River Samsoon Darassi. The abandoned positions were found full of Turk corpses.

In the direction of Gumischlor the Turks in an attempt to advance to the north were repulsed and driven back to their trenches. In the direction of Baiburt the Russian advance guards took the Turks in the rear during the night on a height in the region of Vartanis, and in a bayonet attack hurled them over a precipice. The Russians returned safely.

Pressure by important enemy forces is recorded in the Kering region in the direction of Bagdad.

Barnardo Youth Killed Farmer.

SIMCOE, July 4.—Robert Henry Beecher, a Barnardo boy, 16 years of age, is in jail here on a charge of killing John Simmons, a farmer at Forestville, 18 miles south-west of Simcoe, Sunday afternoon. The youth has lived for seven years with Miss Ida Carr, who owns a farm at Forestville. Miss Carr had engaged John Simmons to work the farm for her. Sunday afternoon after returning from church Simmons and young Beecher went out to practice shooting with a 22 rifle. Miss Carr declares that an altercation arose between the two and that Simmons was shot when he attempted to take the rifle from the boy. He died instantly.

LONDON PAPERS WARY.

They Are Not Sure That Battle of Somme Is the "Big Push."

LONDON, July 4.—The London papers in their editorials deal with the situation on the British front in somewhat reserved fashion, some of them pointing out that it is not yet known whether this is really the long-awaited "big push" or only another feint in greater force than any of the previous movements.

The Graphic remarks: "Our bombardment is still being maintained along the whole front, and the enemy does not know whether we may not at any moment rush another stretch of line. The necessity of sending adequate reinforcements to cope with the situation may necessitate the Germans abandoning the enterprise against Verdun."

The Express says: "The war has entered a fresh and probably the last phase. Our hopes may well be high, but our patience must continue."

The Daily News says: "The fact that Germany has lost the offensive does not mean that she is not still a formidable foe. We cannot tell what her temper may be under the shadow of defeat—whether she will fight to the last ditch, or seek to save the utmost from the wreckage."

Chaperon.

The word "chaperon" comes from the name of a mantle worn by Spanish duennas, with which they are supposed to cover and shield the young girls under their care.

In the Laboratory.

"What are you making there?" "That final analysis you've heard so much about," answered the chemist.

Slight not what's near through aiming at what's far.—Euripides.

used, light, 20 to 40 lbs., 85c; short heavy, 35 to 40 lbs., 85c; short clear backs, 16 to 20 lbs., 81c; shoulders, square, 11 to 13 lbs., 65c.

CATTLE MARKETS

UNION STOCK YARDS.

TORONTO, July 4.—Receipts of live stock at the Union Yards were: 166 cars, comprising 3,388 cattle, 162 calves, 561 hogs, 341 sheep.

There was a heavy run of cattle at this market. Choice butcher steers were steady; best cows, steady and firm; best heavy steers and all other grades of cattle, 15c to 25c below last week. Choice veal calves were firm at 11 1/2c to 12 1/2c lb. Choice spring lambs were firm at 14c to 15c; sheep steady at last week's prices; hogs firm at prices as quoted last week by the packers.

Butchers' Cattle.

Choice heavy steers, \$10.15 to \$10.75; good heavy steers, \$9.75 to \$10.

Stockers and Feeders.

Choice, \$9.50 to \$10; good, \$9.15 to \$9.40; medium, \$8.50 to \$9; common, \$7.75 to \$8.25.

Cows.

Choice, \$7.30 to \$7.60; good, \$7.10 to \$7.35; medium, \$6 to \$6.50; common, \$5.50 to \$6.

Canners and Cutters

\$4 to \$4.65.

Bulls.

Best, \$8 to \$8.40; good, \$7.50 to \$8; medium, \$6.50 to \$7; common, \$5.50 to \$6.

Stockers and Feeders.

\$6 to \$8.

Milkers and Springers.

Best, \$80 to \$100; medium, \$60 to \$70.

Sheep and Lambs.

Choice spring lambs, 14c to 15 per lb.; light, handy sheep, 7 1/2c to 9c; heavy fat sheep, 5c to 6c.

Veal Calves.

Choice, 11 1/2c to 12 1/2c per lb.; medium, 9c to 10 1/2c; common, 7c to 9c.

Hogs.

weighed off cars, \$11.65; fed and watered, \$11.40; f.o.b., \$10.90.

McDonald & Halligan

sold 32 carloads: Choice heavy steers at \$10.50 to \$10.75; good heavy steers, \$10 to \$10.25; choice butcher cattle, \$9.50 to \$9.85; good butcher cattle, \$9.15 to \$9.35; medium butcher cattle, \$8.75 to \$9; common, \$7.75 to \$8.50.

Cows.

Choice, \$7.50 to \$7.75; good, \$7.10 to \$7.35; medium, \$6.50 to \$6.75; common, \$5.50 to \$6.

Bulls.

Best, \$8.25 to \$8.50; good, \$7.50 to \$8; medium, \$6.50 to \$7; common, \$5.50 to \$6.

Stockers and feeders.

Best, \$3.25 to \$3.60; medium, \$7.75 to \$8.

Milkers and springers.

Best, \$80 to \$100; medium, \$60 to \$70.

EAST BUFFALO LIVE STOCK.

EAST BUFFALO, July 3.—Cattle—Receipts, 2800; active; shipping steers, \$9 to \$11.50; butchers, \$8 to \$10.40; heifers, \$7 to \$9.25; cows, \$4.50 to \$5; bulls, \$5 to \$7.75; stockers and feeders, \$6.75 to \$7.75; stock heifers, \$6 to \$6.50; fresh cows, and springers, active, \$50 to \$105.

Veals—Receipts, 1050; active; \$4.50 to \$12.

Hogs—Receipts 10,000; heavy, \$10.45 to \$10.50; mixed, \$10.40 to \$10.45; yorkers, \$10 to \$10.40; pigs, \$10; roughs, \$8.85 to \$9; stags, \$8.50 to \$7.50.

Sheep and lambs—Receipts, 800; active; lambs, \$7 to \$12; yearlings, \$5.50 to \$10; weathers, \$8 to \$8.35; ewes, \$4 to \$7.50; sheep, mixed, \$7.50 to \$7.75.

His Remarks.

"Mr. Jaggs never opened his mouth while his wife was entertaining her guests the other night."

"Oh, yes, he did—several times!"

"What did he say?"

"Nothing. He yawned."

Not So Deep.

"His book is said to be rather deep."

"Can't be very deep. That little bit of a girl over yonder told me she managed to wade through it."—Kansas City Journal.

LURING THE FISH.

Just What Kinds of Natural Bait Are the Most Effective.

Natural baits are those which most anglers are accustomed to using. Such baits include worms, frogs, minnows, grasshoppers, grubs, salt pork, crickets and many kind of real fish food.

The most common of all baits is the angworm, and it is used more than any other because it can be secured so easily. This bait can be used for all kinds of fish and is accepted by large and small alike, no matter whether surface or bottom feeders.

The worms may be used just as they are taken from the ground, and they are generally used in that condition. But if they are dug a week before, washed and fed with a few bread-crumbs soaked in milk they become toughened and make the best bait.

It is a common saying that the big worm will match the big fish. There appears to be little if anything in this, but a worm that is just the right size to cover the hook when properly impaled without crowding is the right size.

The grasshopper is another good bait, especially for surface feeding fish. Perhaps no other bait will cause a lazy old trout to rise so quickly from the depths as will a lively grasshopper.

For black bass and other large fish the minnow is the favorite bait. By "minnow" is meant a small fish, for small fish are invariably called minnows by anglers, regardless of their species.

Small frogs make good bait for all game fish and may be used with a single hook by inserting through the lips, like baiting with a minnow. The dobson, or helgramite, is excellent as bait for many kinds of fish.

Crawfish are common as bait used for still fishing. They are best at the time they have shed their shell and in this condition may be hooked through the body, but at other times should be hooked through the tail. Bass are fond of crawfish. A bait that is quite a favorite for bass is a strip of fat salt pork cut in the shape of the letter V, with the hook through the small end.—New York American.

Insect Life.

In a report to the Smithsonian institution James Buckland says few persons realize how enormous is the number of insect species or how amazing is their power of multiplication. The number of insect species is greater by far than that of the species of all other living creatures combined. Although 300,000 have been described, probably twice that number remain to be examined. Virtually all living animals, as well as most plants, supply food for these innumerable hordes. The fecundity of certain insect forms is astounding. Professor Riley once computed that the progeny of the hop aphid, which sees thirteen generations born to it in a single year, would, if unchecked to the end of the twelfth generation, multiply to the inconceivable number of ten sextillions of individuals.

Subtle Advertising.

A successful hotel manager pointed to the advertisement of a hotel at a fashionable resort. This advertise-

MUSIC IN MEXICO.

Every Little Hamlet Has a Band Stand of Its Own.

A HELP IN THE GAME OF LOVE.

To the Strains of Melody the Youths and Maidens "Play Bear," a Peculiar National Diversion That Is the Correct Road to Matrimony.

Music plays a very prominent part in the social life of Mexico, not alone in the capital and other larger cities, but all over that picturesque land. A Mexican who can play no musical instrument is nothing less than a curiosity. There is no hamlet so insignificant that it has no band. Eight or ten men get together and decide to form a band. Having reached that decision, they go to the jefe politico, or mayor.

"All right," he will tell them. "You are to play Wednesday evenings from 6 to 9 and Sunday mornings from 9 to 12," and a record is made.

And during these hours, rain or shine, hot or cold, through famine, war and pestilence, as long as those men are alive and in the town, the band is in the band stand playing for such as choose to linger in the plaza, or public square.

About the evening concerts much of the social and domestic life of Mexico centers. It is at the concerts that many a youth and maiden first meet and begin to "play bear," a game indigenous and peculiar to Mexico, without which no self respecting Mexican couple adventures on matrimony.

The general plan of every plaza is much the same. In the center is the band stand. Immediately surrounding the band stand is an open paved space. Then there are flower bordered walks with plenty of benches.

Round the edge of the plaza, outside the trees and flowers, is another broad paved walk. Upon this outer walk are grouped the poorer Mexicans, the peons. On the benches sit the fathers, the mothers, the older folk, of the better classes. Round the walk that surrounds the band stand saunter tirelessly the youths and maidens of the same class.

The women circle to the left on the outside, the men in the opposite direction, on the inside. Thus every one sees every one else innumerable times during the evening. And in this melodious circling a youth sets eyes on a maiden who strikes his fancy—the game of "playing bear" has begun.

He looks steadily at his charmer every time they pass, and she, if she is pleased, glances at him in return. After they have passed each other ten or a dozen times he is at the edge of the procession in which he walks, and she has moved to the edge of the column of young women.

Then the young man, with a friend, withdraws to some cantina, or cafe, and writes an ardent note. On the next round his friend in passing slips it into the hand of her companion. Then they continue their strolling until the concert is at an end.

LITTLE, BLACK AND UGLY.

And Very Touchy, Too, Is the Devil's Coach Horse Beetle.

My, how very touchy he is! Point your finger at him and see how he turns up his tail and opens his jaws, just as if he were a lion instead of a tiny beetle. He thinks he is going to frighten us away. But we won't hurt him, anyway, because he is a very valuable sort of beetle—a tiny garbage man. He's called the devil's coach horse beetle.

He's long, black and ugly. He spends his time hiding under stones or crawling about in gardens. Like a majority of beetles, he's one of nature's scavengers.

Have you ever thought what a dirty old world this would be if it were not for the animals and birds and insects that go around cleaning up? Certain birds and animals devour the bodies of other animals, but they leave it to the beetles to clean up the crumbs.

So he's busy all day devouring the little particles that the big eyes of the buzzard cannot see. He's always celebrating clean up week. So don't blame him if he turns up the end of his tail and looks at you threateningly when you disturb him. He's too busy to play.

MYSTERIES IN HOLES.

What Becomes of the Earth Rodents Dig From Their Dens?

I have found two weasels' dens on the margin of a muck swamp in the woods that presented the same insoluble problem as the chipmunk's hole—what has become of the bushel or more of earth that must have been brought to the surface? Both the weasel and the chipmunk have several galleries and one or more large chambers or dining halls, and how each manages to hide or obliterate all the loose soil that must have been removed is a question which has long puzzled me.

If we had an American Fabre or a man who would give himself up to the study of the life histories of our rodents with the same patience and enthusiasm that the wonderful Frenchman has shown concerning the life histories of the insects he would doubtless soon solve the mystery.

I used to think that the chipmunk carried away the soil in his cheek pockets, and I have so declared in one of my books, but I am now very certain that he does not—only his food stores are thus carried.—John Burroughs

Birds and Glass.

It has been frequently noticed that no wild bird can understand the properties of glass, and great numbers, ranging in size from a pheasant to a titmouse, are killed by flying against the windows of country houses.

If a room possesses a large mirror reflecting the view seen through an open window birds are particularly liable to be deceived, and especially if frightened, into thinking that they can fly through it.

Sparrow hawks will sometimes chase their intended victims into strange places. Some years ago a member of this species pursued a small bird through the open window of a railway

MASKED TUAREGS

Ruthless Buccaneers of the Sahara Desert

AT WAR WITH ALL

These Nomads of the Trade of Northern Africa Live Upon All Caravans They Live In Mystery and Ex-

"In northern Africa there is a less country, inhabited by the masked Tuaregs, fascinate the mystery and exclusivity which they have surrounded. These people, natives and middle desert, are the allies, but wage a furtive guerrilla war with all who invade the Sahara sands of their domain. The buccaneers of the sand, forever at war with their own restraints," say the people always willing the maintenance of their tribute upon the ancient caravan routes.

"Masked Tuaregs are nomads, a white desert people. Their country is probably the most mobile on earth. Even before civilization began to leave records of its history the Berbers, were long established in northern Africa. The invasion of the eleventh century placed them from their upon the seacoast and drove the savage area of the interior where, with their hands raised, all who came into their patri, they have maintained through the intervening despite lack of water, sand and lack of farming land, required force of arms from the Egyptians, to the north from the blacks of the South, such necessities and their cheerless portion of M cannot supply them.

"There are five main Tuareg confederation, and the desert from Tuat to and from Fezzan to Zin homes are reared in the wastes, where vast solitudes and unmarked shroud everything in mystery.

"The Tuaregs wear the turban cloth drawn around allowing nothing but the seen. It is worn for the protecting the throat and the cutting blasts of fine and also probably as enhancing the mystery of they seldom or never wear masks, whether roving or visiting in the cities. Due to these cloths they masked Tuaregs, while they are dark blue and white, being worn by Tuareg not

A successful hotel manager pointed to the advertisement of a hotel at a fashionable resort. This advertisement read:

"Special rates to single men."

"The proprietor of that hotel," said he, "deserves to succeed. He lays in his advertisement a subtle trap for mothers with marriageable daughters. They read the advertisement, and they conclude that, given lower rates at this hotel, single men will be plentiful. They therefore decide that there is the place undoubtedly to take their daughters."

Then, laughing, he concluded:

"These mothers quite correctly believe that as far as their daughters' chances of matrimony are concerned the more the marryer."—Exchange.

Military Skaters.

"In the Norwegian army there is a corps of infantry every man of which is an expert skater. On skates this corps can perform a day's march of eighty miles, which equals the performances of the best trained cavalry in Europe. The evolutions of the corps are confined to the great fiords which indent the coast of Norway, these fiords being frozen over during the long winter season.

Retort Courteous.

"What?" exclaimed the spinster who was beginning to carry weight for age, "Do you mean to tell me your baby is ten months old and can't walk, yet? Why, I could go it alone at the age of six months!"

"Yes," rejoined the young mother, indignantly, "and I notice you have been going it alone ever since."

The Inwardness.

"Please, ma'am," said the small boy on the doorstep, "ma says kin she borrow a can o' mustard."

"Certainly," replied the housewife. "Is mamma going to make a salad?"

"No, ma'am," declared the veracious child, "but pa said she gave him a pain in the neck, an' she wants ter sock a plaster on to him."

Fixing the Reward.

"What do I get for this stunt?" asked the naughty amateur.

"You get nothing from me for it as a manager," replied that individual, "but if I were a magistrate as well you'd get sixty days."

What Did He Mean?

Hicks—You have a talking machine, haven't you? Wicks—Yes; I have two talking machines at my house. One you can turn off when you get tired of the line of talk, and the other one you can't.

Editor Saved Him.

"I wrote a poem once."

"Was it printed?"

"No; the editor to whom I sent it proved himself a true friend."

"At twenty years of age the wit reigns, at thirty the wit, and at forty the judgment."—Gracian.

to it into the hand of her companion. Then they continue their strolling until the concert is at an end.

On the next concert evening the performance is repeated, only this time the young lady is the one who presents the note, which she has written in her home. If she rejects her suitor's advances he persists or desists, according as he is faint hearted or not.

If he meets with success he begins the next phase of the game. Each evening he will be seen opposite his lady's house, passing back and forth like a sentry walking his post. Even during business hours he will rise suddenly from his stool, seize his hat, rush frantically to his accustomed beat and for several minutes walk up and down, gazing reproachfully at the barred windows across the way.

As time goes on, after six weeks or two months, say, have passed, the girl is at last to be seen seated in the window. Then ensues another period of from two weeks to a month. The young man's walks gradually shorten, and one evening he is to be seen underneath the window, gazing mournfully upward for hours, much to the discomfort of passersby. But no one grumbles. All the world loves a lover—especially in Mexico.

After this stage father and son call formally on the father of the young lady and make a proposal of marriage.

When all the arrangements have been made the young man for the first time calls at the home of his affianced wife and meets her face to face, but never except in the company of a third person—mother, father or aunt.—Youth's Companion.

When Solid Iron Floats.

Experiments have shown that if a ball of solid iron be lowered into a mass of liquid iron by means of a metal fork the ball at first sinks to the bottom with the fork, but that in a few seconds it will leave the prongs and rise to the surface, where it continues to float until it melts. The rising is explained by the expansion of the ball, due to heating, whereby it becomes, bulk for bulk, less dense than the molten metal.

Friendly Criticism.

Pennibs—Two of my latest poems appeared in the last issue of McDuff's Magazine. Inkerton—Yes; I noticed them. Pennibs—Would you mind giving me your opinion of them? Inkerton—Well, to be candid, I thought the one was awfully simple and the other simply awful.

Method makes men win. Thus is success reduced to the science of correct calculation.

Mind Reading.

"Do you think there is any such thing as mind reading?" asked the eminent diplomat.

"Oh, yes!" replied Miss Cayenne. "If I pay very close attention to what you say and analyze it carefully I often fancy I get a glimmer of what you are thinking about."

Shiloh 25

The family remedy for Coughs and Colds. Small dose. Small bottle. Best since 1870.

places. Some years ago a member of this species pursued a small bird through the open window of a railway carriage in motion. In its blind determination to secure the panting fugitive it entangled its claws in the meshes of the hatrack and was ignominiously slain by an astonished passenger with an umbrella.

Causes and Effects.

If man was to judge of causes by their effects there would be no small causes in the universe. In a nature where everything is connected, where everything acts and reacts, moves and changes, composes and decomposes, forms and destroys, there is not an atom which does not play an important and necessary part; there is not an imperceptible particle, however minute, which, placed in convenient circumstances, does not operate the most prodigious effects. If man was in a capacity to follow the eternal chain, to pursue the concatenated links that connect with their causes all the effects he witnesses * * * he would find that they are true atoms which nature employs to move the moral world.—Holbach.

Pat's Retort.

An English tourist was being taken through the country by an Irish jarvey. They were traveling along the road when an ass put its head over the fence and began to bray with all its power.

"Well, Pat," said the Englishman, "is that the 'Wearin' of the Green'?"

"Arrah, no, yer honor," said Pat; "that's 'Johnny, I hardly knew you.'"

Glaciers Are Brittle.

An authority on the subject says that the substance of a glacier is brittle, though solid, and that its descent down a valley is caused by its constant fracture produced by gravitation and the sliding forward of the whole mass, the surfaces of the fractures speedily reuniting by regulation.

Ornamented.

Old Mrs. Blunderby was telling her caller about a play she had been to the evening before. One of the characters was an Englishman of the "silly awss" type. "He did look so awfully ridiculous with that monologue in his eye," chuckled the old lady.

Safety First.

Mr. Newed—Will you have a piece of this angel cake, darling? Newed (cautiously)—Well, dear, you—er—know I don't care much for cake. Did you make it? Mrs. Newed—No; mamma sent it over. Newed—Give me two pieces, please.

A Reminder.

"The old fashioned boy used to mind every word his father said."

"Yes," replied the somewhat cynical youth, "but you must remember that the old fashioned boy had one of those thoughtful old fashioned fathers."

Those are our friends who reproband us, not those who flatter us.—Pythagoras.

them 'people of the vell' are dark blue and white, being worn by Tuareg nobles, latter by the serfs and slaves.

"Some centers for trade towns, are situated in the desert. These are Wargla, Ghat, Ghadames, Murzuk and so on. However, the Tuareg has for trade and industry. He is less, enduring, hard fighting, er along the merchandise cross the desert. Two imposts leave Tripoli, on the coast, erse 3,000 miles of sands, wastes to the Sudan, where goes of skins, gold, ivory interior African products upon camels and brought. Sometimes a single caravan of thousands of camels and diso to the value of hundred sands of dollars. Whe through the Tuareg country of such caravans have had tribute to the chieftains b for safe escort or run the risk all their goods.

"From Morocco to Tripoli less ferocity, the cunning and ing of the Tuareg are mingle traditions unpleasant to peaceful natives along the Tuaregs meanwhile openly the caravans in course of o the coast cities and thrive tribute they are able to ex

"The Tuaregs are of the Iber stock, the noble familie with other blood, and in the guage they call themselves people." Nominally they are medans, and some of the compose the most intolerant like sect in Islam, the Sena. Their hatred for the foreign er even than that bred by ligion, and so they are more than ever were the Chinese nese. Their social organ vides them into five classes, the priests, the serfs, breeds and the slaves. All classes have this that is de they form together the Tuareg which holds itself superior other peoples of the earth."

A Huge Flower.

The largest bloom known is the "bo-o." It is found on island of Mindanao, the most of the Philippine group. Its name is somewhat longer than the name, the botanists record as Rafflesia Schadenbergia. was first discovered in Jan by an exploring expedition, Dr. Alexander Schadenberg. The flower weighs from twenty pounds.

FLIGHT OF ARETHUSA.

Mythological Origin of a Favorite
British Warship Name.

From the days of Drake "Arethusa" has always been the favorite name of a swift, light cruiser in the British navy. A corvet named Arethusa took part in the battle of Cape St. Vincent on Feb. 14, 1797, when Nelson, then under Jervis, defeated the Spanish fleet, and this Arethusa was henceforth with the great admiral down to his last battle at Trafalgar eight years later.

As Arethusas have succeeded one another in the British navy, legends have gathered around the name until the ship so named has seemed to symbolize the mythological origin of the term.

There is in Peloponnesus a river called Morea. In ancient times, it is said, it was presided over by a river god named Alpheus. Alpheus fell in love with the river nymph, Arethusa, and pursued her through the water. Diana, hearing her cries of distress, opened a passage for the stream so that it flowed under the sea to Sicily, where, near Syracuse, Arethusa disappeared in the spray of a beautiful fountain.

The river, untainted by the sea, still flows underground to the fountain, and Alpheus is still said to be searching for the nymph, but never finds her. This is why her naval namesakes have eluded the enemy through all the centuries and have been believed by the superstitious to be invulnerable.

Odor of Sanctity.

The sexton of a suburban church has many stories to tell of the comments made by visitors.

On the occasion of a festival, when the church was beautifully decorated with evergreens and flowers, an old lady walked up the aisle to the chancel and stood sniffing the air after every one had left the church.

"Don't it smell solemn?" she said at last to the sexton, as she turned away with evident reluctance.

"I don't know as I ever realized just what the 'odor of sanctity' meant before today."

English Law of Arrests.

No arrests may be made in England on a Sunday except for treason, felony or a breach of the peace, and freedom from arrest at any time on civil process is a privilege enjoyed by members of the royal family and their servants, bishops, peers and peeresses and members of parliament during the sitting of parliament and forty days before and after each session.

Kipling's Corncob.

"Did Kipling ever steal one of my corncob pipes?" said the late Mark Twain once.

"Never, and if he says so he's wrong. He tried to steal one and failed; then he tried to steal another, but I prevented the theft and gave it to him, probably the only pipe that Kipling ever got honestly."

Plant That Feigns Death.

In South America there is a plant, a species of mimosa, which resorts to death feigning, evidently for the purpose of protecting itself from being eaten.

JUST PLAIN COUNTRY.

Beauty to Be Found in Rural Scenes
Round About Home.

Like many another person of the present day, I have from time to time traveled as far as my means would permit—and a little farther—exploring countries new and strange or new and strange to me, climbing high mountains, sailing broad seas and making the acquaintance of coasts as full of wonder and of mystery, swept by the wings of gulls, washed by green waves, as were the far shores of Odysseus' wide adventure to Odysseus. And I have had huge enjoyment in it all, standing to watch at distant corners of the earth the pageant of wind and wave and cloud, trudging up unknown hills in a fine mood of adventure, driving across mountain passes into countries as fresh and as enchanting as if they had been created overnight to meet this first fresh sense of quest.

Yet sometimes and oftentimes I realize that no strange shore or wonderful mountain range has brought a sense of pleasure quite so deep as that which comes at moments in mere country, the plain country of the land of home. I do not mean any of the show regions of America. The glories of the Canadian Rockies, the wonders of the Yosemite, are unknown to me. I mean the common country of old fashioned fences and winding roads, where tangles of alder and sumac cluster by the gray rails or grayer stone—common country, where the hay grows long in June and the woods creep close to the hayfields and a little stream perhaps goes threading its way softly between the grasses.

Here is no sense of effort in your enjoyment. All is near and dear, familiar, perhaps for generations a part of your forefathers' lives. There is no need to try your eyes to take in the meaning of jagged rock outlines and heaped earth masses or stretches of desert sand. You have not purchased an expensive ticket whose worth to the uttermost penny must be extracted from the panorama before you, making you study it anxiously, eager to do your duty by every shade and outline. You do not have to strain to the sublime, as you do when confronted by scenery, capitalized scenery—capitalized in every sense of the word. You do but sit quietly upon some green bank, full of unforced pleasure that hardly names itself pleasure, so unconscious it is.—Scribner's.

Quarries of Carrara.

The wealth of the city and province of Carrara, Italy, which has a population of 220,000, is derived from the 500 quarries, which give employment in one way and another to over 8,000 workmen. The quarries are situated in the mountains above the town, and the stone is brought down to the plain to be sawed and worked, largely in shops connected with the homes of the workmen. Explosives are used to obtain the largest size blocks, although wire saws driven by electricity are used in a few instances to quarry the blocks to the desired dimensions.

FOOLS THE COWS.

Dead Nettle Is Harmless, but Makes It

HEAT FLASHES, DIZZY, NERVOUS

Mrs. Wynn Tells How Lydia E. Pinkham's Vegetable Compound Helped Her During Change of Life.

Richmond, Va. — "After taking seven bottles of Lydia E. Pinkham's Vegetable Compound I feel like a new woman. I always had a headache during the Change of Life and was also troubled with other bad feelings common at that time—dizzy spells, nervous feelings and heat flashes. Now I am in better health than I ever was and recommend your remedies to all my friends."—Mrs. LENA WYNN, 2812 E. O Street, Richmond, Va.

While Change of Life is a most critical period of a woman's existence, the annoying symptoms which accompany it may be controlled, and normal health restored by the timely use of Lydia E. Pinkham's Vegetable Compound.

Such warning symptoms are a sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and inquietude, and dizziness.

For these abnormal conditions do not fail to take Lydia E. Pinkham's Vegetable Compound.

DIVORCE IN EGYPT.

Ninety Out of Every Hundred Matings
There End Disastrously.

There is one country in the world, at least, where divorce is more frequent than in the United States. In Egypt 90 per cent of marriages end in divorce, says Elizabeth Cooper in her book, "The Harim and the Purdah," and it has been observed that two people who live to old age together without one of them having been divorced are rarely found.

Divorce can be had for incompatibility by mutual consent, Mrs. Cooper says, without recourse to the courts, but if the wife wishes to be free and the husband will not permit it the woman may go before a judge and state her case, and if her charges are proved she will be granted her petition. Often a woman will return her dower or agree to forfeit the part not yet paid, and in many cases the wife makes a money payment to the avaricious husband in return for her liberty.

Divorce is easier for the Egyptian husband than for the wife, according to Mrs. Cooper, and following a divorce the woman is commanded to remain single three months, while the man may remarry immediately.

How We Got Our Canned Fish.

The fishing parties usually stay out from ten days to three weeks. They

aregs, while the Arabs call it of the veil. The masks are blue and white, the former by Tuareg nobles and the latter by serfs and slaves. The Tuaregs enter for trade, Tuareg situated in the middle desert are Wargla, Timbuktu, Ghat, Gao, Murzuk and Insalah. The Tuareg has little care for agriculture and industry. He is a fearless, hard fighting adventurous merchant who trails through the desert. Two important trails lead, one on the coast, and traverses miles of sands and barren lands to the Sudan, where rich caravans of gold, ivory and other African products are loaded and brought northward. A single caravan consists of hundreds of camels and merchandise of value of hundreds of thousands of dollars. When passing through Tuareg country the leaders of the caravans have had to pay the chiefs by the way or risk the loss of their goods. From Tripoli to the south, the cunning and the daring Tuaregs are mingled in all the unpleasant to the more civilized natives along the coast. They meanwhile openly spy upon the foreigners in course of outfitting in the cities and thrive upon the weakness of the natives. They are able to exact tribute from the natives. The Tuaregs are of the purest Berber stock, the noble families unmixed with Arab blood, and in their own language call themselves "the noble." Domestically they are Mohammedans, but some of their number are most intolerant and warlike. Islam, the Senussite sect, is hated by the foreigner is great. The Tuareg that bred by their religion so they are more exclusive than the Chinese or Japanese. Their social organization divides into five classes—the nobles, the priests, the serfs, the cross-bred and the slaves. All of these classes are democratic together the Tuareg family, is itself superior to all the peoples of the earth."

In South America there is a plant, a species of mimosa, which resorts to death feigning, evidently for the purpose of preventing grass eating animals from eating it. In its natural state this plant has a vivid green hue, but directly it is touched by a human finger or by any living animal it collapses into a tangle of apparently dead and withered stems.

FOOLS THE COWS.

Dead Nettle Is Harmless, but Makes Itself Look Dangerous.

In this case the joke's on the cow. She's fooled into the belief that this little, harmless plant will bite her. The plant helps with the joke by masquerading as a dangerous weed, with real teeth, whereas it wouldn't hurt a flea. This plant is the dead nettle.

One of its cousins, the stinging nettle, covers itself with sharp, poisonous hairs. The cow has learned to avoid the weed. So the dead nettle makes up to look like its cousin, and the cow leaves it alone.

How We Get Our Canned Fish.

The fishing parties usually stay out from ten days to three weeks. They carry ice with them, and the moment the fish are taken from the hooks they are cleaned and put in the ice and kept there until they reach the cold storage plant. They are washed as soon as they are landed and shipped in cold storage cars direct to the markets, or they may be kept for some time before shipping.

The next step is to dip each fish four or five times in fresh water until it becomes entirely incased in a thin sheet of clear ice. It can then be held in cold storage at a temperature of 4 degrees below freezing until it is needed for export. The fish get a fresh coating of ice before they are shipped. They are then wrapped separately in vegetable parchment paper and are packed in paper lined boxes of 375 pounds capacity and sent eastward in the cold storage trains.—Christian Herald.

PURITY IN GROCERIES

Purity is absolute freedom from adulteration when applied to groceries and foodstuffs. No matter what price you pay for an article, if it is not of sterling purity, it should not be consumed as food.

We make it an unwavering and rigid rule that all articles sold by us be of a high standard of purity, otherwise we will not send it out to our customers. This is a strong reason why you should trade at Judson's.

Why not 'phone 196 and give a trial order.

We pay the Highest Cash Price for Eggs.

BY-LAW No. 77 (1916)

A by-law to provide for borrowing \$1200.00 upon debentures to pay for the cost of the construction of concrete sidewalks in the Village of Bath.

WHEREAS it is necessary and desirable in the public interest to construct concrete sidewalks upon certain of the streets in the Village of Bath, and

WHEREAS in order thereto it is necessary to borrow the sum of \$1200.00 on the credit of said Municipality and to issue debentures therefor, bearing interest at the rate of 5 per cent. per annum, which said sum of \$1200.00 is the amount of the debt to be created by this by-law, and

WHEREAS it is expedient to make the principal of said debt repayable in yearly sums during the period of five years of such amounts respectively that the aggregate amount payable for principal and interest in any year shall be equal as nearly as may be to the amount so payable for principal and interest in any of the other years.

WHEREAS it will be necessary to raise annually the sum of \$277.16 during the period of years to pay the said sums of principal and interest as they become due, and

WHEREAS the whole rateable property of the Village of Bath according to the last revised assessment roll is the sum of \$130,847, and the existing debenture debt, exclusive of local improvements debts secured by special acts, rates or assessment is the sum of \$5350.26 of which there is no part of the principal or interest in arrears,

BE IT THEREFORE ENACTED by the Council of the Corporation of the Village of Bath as follows:—

1. It shall be lawful for the Reeve of the said Municipality and he is authorized and instructed to sign and issue said debentures hereby authorized to be issued and to cause the same to be signed by the Treasurer of the said Municipality and the Clerk of the said Municipality is hereby authorized and instructed to attach the seal of the said Municipality to the said debentures.

2. That for the purpose of raising the sum of \$1200.00 five debentures of the said Village of Bath in the sum of \$277.16 each shall be issued on the first day of December, 1916 each of which debentures shall be dated on the date of the issue thereof and shall be payable one on the 1st day of December in each of the years from 1917 to 1921 both inclusive at the office of the Treasurer of the Village of Bath without interest, the interest calculated at the rate of 5 per cent. per annum on said loan having been included in the amount of the said debentures.

3. That during the currency of said debentures there shall be raised annually by special rate on all the rateable property of the Village of Bath the sum of \$277.16 for the purpose of paying the amount due in each of the said years for principal and interest in respect of the said debt.

4. The said debentures shall be sold and the proceeds thereof shall be applied in paying and discharging the cost of the construction of the said sidewalks and in no other way or for no other purpose whatever.

5. This by-law shall come into force and take effect after it has been submitted to the electors entitled to

The Red Cross Society

The Red Cross Society wishes to thank the teacher and pupils of S. S. No. 19, North Fredericksburg, for sending us \$4.00 for our Red Cross work. The work and generosity of our school children throughout the county in this regard have been very favorably commented upon.

Our room is open every Saturday when there is always plenty of work requiring willing and unselfish workers. Our wounded and suffering soldiers do appreciate our work so much it is certainly a pleasure as well as a duty to be present every Saturday. Refreshments are always served in the afternoon.

A sewing machine for the summer months is very much needed by our Society. We will be greatly indebted to anyone kindly giving us the loan of one.

Women's Patriotic Service and Red Cross Work

Through the "U. E. Loyalist" Chapter, I.O.D.E.

The Committee wish to acknowledge with very grateful thanks the donation of \$5.00 from a generous friend in California, through Mrs. F. L. Hooper, for our Red Cross work.

An excellent box of clothing has been forwarded this week for refugees, which is greatly needed, therefore, we shall continue to collect any clothing in good condition for men, women, children and infants, which our friends can spare for these poor, homeless wanderers.

A general appeal throughout Ontario has been sent out by the Secours National of Toronto, the representatives of the National War Relief Committee of Paris, France; asking for donations for the relief of suffering France, and to aid her in supplying the most pressing and immediate needs of 3,000,000 Belgian and Serbian refugees, who have sought a refuge and hospitality within her frontiers.

Heretofore, France has responded nobly to the enormous demands upon her humanity and resources in supplying aid and shelter for her stricken allies—but, the time has now come when she can no longer depend wholly upon herself. Therefore, as France has been, and is still doing magnificent service for us in the field, donations are asked for on the 14th July, the great day of the French Republic. We hope that all members of the "U. E. Loyalist" Chapter, I.O.D.E. and of the above Committee, will respond to the best of their ability to this call. Will you not all help in this tribute to France on her National Day?

An Artist's Criticism.

Probably no two artists ever criticised each other more severely than did Fuseli and Northcote, yet they remained fast friends. At one time Fuseli was looking at Northcote's painting of the angel meeting Balaam and his ass. "How did you like it?" asked Northcote after a long silence. "Northcote," replied Fuseli promptly, "you're an angel at an ass, but an ass at an angel."

That Telltale Tea.

"How old is your big sister?" asked a caller of a little girl who was entertaining him in a Washington home until said big sister came in.

"Well," replied the little girl. "I don't know just how old she is, but she has got to the age when tea rests her."

Modern Efficiency.

"I don't see how Adele could possibly stop to get married. She has such a passion for traveling."

"But she did it to save time."

"How's that?"

"She married a shipping clerk and now he packs all her trunks for her."

Mr. Rowell To England

Mr. N. W. Rowell, the Liberal Leader has gone to England where he will make a special study of advanced legislation along the lines of social and moral reform, as outlined in his speech before the Ontario Women's Liberal Association last month. On that occasion Mr. Rowell intimated that the abolition of the bar had removed the greatest obstacle to a genuine social advance, and set forth a number of important reforms which were urgently needed.

He pointed out the necessity for a revision of our Educational system to meet present conditions and emphasized the need of a strong agricultural policy for Ontario. Such questions as that of providing for the full and healthy development of our children; sickness and unemployment insurance; old age and widows' pensions; tax reform; and the care of the feeble-minded, were featured as outstanding social reforms deserving the most careful consideration on the part of the people of the province.

With his customary zeal and energy, Mr. Rowell has no sooner achieved the consummation of his aim to do away with the evils of the liquor traffic, then he at once devotes his attention to a study of the best methods of combating the other evils in our midst.

Whilst in England the Liberal Leader will also investigate the means employed there in organizing the resources of the country, with a view to reporting on his return to the committee appointed at the last session of the Legislature to secure better organization of the resources of Ontario.

NORTH PERTH BYE-ELECTION.

The Conservative press has been very bitter during the last week over what they have termed "in a breach of the war time truce" by the Liberals enforcing an election in North Perth at this time. As a matter of fact, there was never any understanding between the Government and the Opposition in regard to bye-elections during the war. So far as the Liberal Party is concerned Mr. Rowell has permitted each local constituency to decide this matter for itself.

Mr. Torrance, the retiring Conservative member, was elected in 1914 for four years, and after serving but

al members under the leadership of Thomas Marshall, of Lincoln; C. M. Bowman of West Bruce; Nelson Parliament of Prince Edward; G. A. Gillespie, West Peterboro and J. C. Elliott, West Middlesex.

The Government did not accept the Opposition's proposals but the country is undoubtedly indebted to the initiative of these men in presenting such a comprehensive and constructive programme of agricultural progress.

Each of the members took up some different phase of the rural problem. Mr. Bowman dealt with the relation of war and finance to agriculture; Mr. Parliament pleaded the case for rural credits; Mr. Gillespie put forward the claims of the dairying industry; Mr. Elliott devoted himself to agriculture and agricultural education and Mr. Marshall summed up the whole case. It was recognized at the time that the debate had a significance also as giving an indication of the aggressive policies being taken up by the Liberal Party now that the Temperance question has been settled so greatly to their satisfaction.

BILINGUALISM.

Very obvious efforts have been made by Cabinet Ministers and other Government speakers to provoke mischief and sow seeds of disunion in the province by dragging into the provincial arena the bilingual issue as it came up in the Federal House.

As a matter of fact both parties in Ontario are agreed that Ontario must settle her educational policy herself without interference either from any other province or from the Federal Party.

The Liberal Party's stand on the issue is clearly defined in a speech at the recent session of the Legislature by Mr. N. W. Rowell, of which an extract follows:—

"I believe this Province has the absolute legislative right to control all matters of education within the Province under the terms of the constitution. I believe it is a matter in which the Federal Government should not interfere in any shape or form. This Province must retain control of its own affairs, and the minority in this Province, as well as the minority in other Provinces must depend upon the good judgement and fair play of the majority to secure for them what they think they ought to secure. Sir Oliver Mowat, when Prime Minister of Ontario, refused to take part in an agitation arising in this Province for the disallowance of an Act passed by the Legislature of the Province of Quebec. I take that same view to-day, that it is for this House to deal with this matter, and not for the Federal Parliament."

This is not the first time the government has tried to bring in the bilingual issue merely as a blind to divert public attention from their failures in general government and from the real issues. In each bye-election since the general election of 1914 the government has tried to raise the bilingual issue; but in every case—Dundas, West Hamilton and Peel, they have failed to divert the attention of the people who have steadily been voting against them.

NOTE;—

A Nominating Convention for the constituency of South Perth held at Tavistock on the 27th of June, was a great success. Mr. Chas. Bowman, M.P.P., Chief Liberal Whip and Mr. Scott Davidson M.P.P., addressed the convention which was extremely well

Mr. Torrance, the retiring Conservative member, was elected in 1914 for four years, and after serving but six months of the present year (for which he drew his yearly indemnity of \$1400) he has resigned his seat to accept a position in the Stratford Custom House at \$175 a month, given him by his Conservative friends. It was not to be expected under these circumstances, that the Liberals would allow the selection of Mr. Torrance's successor to be left with the Conservative machine in North Perth; and they have elected to choose a candidate in the person of Mr. F. Wellington Hay.

Besides, the fact that Mr. Hearst wired to Mr. Rowell when he was in Ottawa recently, as to whether the Liberal Leader would consent to dispense registration in this riding, plainly shows that the government itself was anxious to bring on an election as quickly as possible.

AGRICULTURE.

In connection with Mr. Rowell's advocacy of a more thorough-going agricultural policy, the Liberal's introduced a resolution in the Legislature on April 5th, 1916, which was rejected by the Government, as follows:—

"That in view of the condition of agriculture in this Province preceding the war and of the pressing problems which the war has created, this House is of the opinion that a great advance in the agricultural policy of the Government is one of the most urgent and vital needs of Ontario today, such policy to include:—

(1) Making more available to rural communities the scientific and technical knowledge taught in our Agricultural College, by the establishment of agricultural schools and demonstration farms throughout the Province; (2) The inauguration of an effective system of rural credits; (3) The development of co-operative effort in buying and selling; (4) Financial assistance by way of loans at a low rate of interest, on the security of land and improvements, to assist desirable settlers in establishing themselves in the newer parts of the Province, and to enable farmers in the older parts of the Province to improve and increase the productivity of their lands."

The introduction of the resolution was accompanied by one of the most carefully thought out, best prepared and intelligent debates which had occurred in the Legislature for a long time. It was organized by the Liber-

Scott Davidson M.P.P., addressed the convention which was extremely well represented. The nomination was unanimously tendered to and accepted by Peter Smith, farmer, of Sebringville.

Shakespearean.

Father, in the hall, had been standing for half an hour while Millicent and Harold bade each other good night in the doorway.

"Parting," quoths Harold, "is such sweet sorrow that I could say good night till!"

At this speech father gets a Shakespearean inspiration of his own and tramps down the stairs.

"Seems to me," he asserts, "that there is too much adieu about nothing here."

Liberal Translations.

At a certain foreign university the students, who had been studying Shakespeare in their native tongue, were requested by an examiner to translate into English the opening lines of Hamlet's soliloquy, "To be or not to be." The following was the result:

The first Frenchman declaimed, "To was or not to am;" the second rendered it, "To were or is to not," while the third gave a still more liberal reading, "To should or not to will."

An Odd Turkish Superstition.

An odd Turkish superstition is as follows: If one finds a piece of bread lying upon the ground he must pick it up, kiss it and carry it until he finds a hole into which the bread can be inserted. To step upon a piece of bread or to leave it lying upon the ground is one of the unpardonable sins and dooms the offender to the third hell, where he is perpetually gored by an ox that has but a single horn that is in the center of his forehead.

The Smile.

We talk of a smile of defiance. There is really no such thing. Such a so called smile is nothing more nor less than a snarl, a survival of the way our savage ancestors had of showing their teeth in order to strike fear into the hearts of their enemies. The real smile of pleasure begins with slightly opening the mouth, and is, of course, traceable to the joy of those same savage forefathers of ours at the prospect of food.

CURIOUS MEALS.

Elephants Are Gormandizers, and Gi-
raffes Have Queer Tastes.

Elephants, at least captive elephants,
have queer tastes, says Pearson's
Weekly in an entertaining article
about the peculiarities of four legged
gourmets. One memorable day in 1903
Suffa Culli, the mighty and popular
Indian elephant at the zoo, ate his
bed. A thirty-six pound truss of straw
had been put down on the floor for
his comfort, and when the keeper went
round in the morning not even the
bands of the truss remained.

Suffa Culli followed it up during the
day by eating three trusses of hay,
weighing 150 pounds. Finally some
one brought a number of Christmas
puddings into the elephant house. Suffa
Culli swallowed his pudding with-
out even opening the cardboard box
that contained it.

A zoo keeper once kept a tally of the
number of hot cross buns an elephant
took down. For six hours on one fine
Good Friday it swallowed buns at
the rate of 400 an hour!

The average giraffe loves nothing
better in the world than a good square
meal of flowers. It has not the slight-
est idea, however, of the difference be-
tween artificial and real flowers.

Some years ago when "garden hats"
were all the rage the giraffe at the zoo
made a day of it. In that glorious
twelve hours it accounted for no fewer
than seventeen hats, the majority
of which were chewed beyond recog-
nition before they could be rescued.

One of the funniest mistakes a gi-
raffe ever made—funny for lookers-on,
that is to say—was when a peacock
strolled into its paddock. The pe-
acock's tail caught the giraffe's eye, and
evidently the animal mistook it for a
gigantic and luxuriant species of flower.
At any rate, before any one could
interfere down came the giraffe's long
neck, and, seizing the peacock by the
tail, he hoisted it in midair. It was
not long before bird and tail said good-
by to each other, and the peacock flut-
tered away, screaming with indigna-
tion. Although a trifle astonished at
the proceedings of the newly discov-
ered flower, the giraffe chewed the tail
with great gusto.

Made a Social Outcast.

In court circles in England it is a
serious matter to incur royal displeas-
ure. The man or woman who does so
intentionally ceases to be recognized
by his majesty, which means social
extinction. The offender's name is
struck out of the visiting list of every
person who is anybody in society, and
should the offender be a man he is po-
litely informed that his resignation
from his club or clubs would not be
out of place. No man or woman of
social repute will in future know him,
and if he be in the army or navy he
has no option but to resign, for he will
find himself cut dead by every one of
his brother officers.—London M. A. P.

"Peddler's Acre."

FIFTY
horse-power SIX \$1450
7 passenger

Costs Less to Buy-Less to Run

THIS new SERIES 17 Studebaker SIX at \$1450 has become celebrated as the SIX that gives more actual, tangible, visible value per dollar of its price than any other SIX cylinder car on the market. And it is the SUPREME value of the year.

No other Six within hundreds of dollars of its price gives the FULL 50 horse power, the roomy SEVEN-passenger capacity, the comfort-insuring 122-inch wheelbase, the 34x4 tires that this Studebaker offers at \$1450.

But not only does this new Studebaker cost less to BUY—it costs a great deal LESS TO RUN.

And the reason is simply that this car is the climax of a long and slow evolution of this one basic Studebaker design.

Result is a motor that gets every ounce of pull that there is in the gasoline—a chassis so perfectly balanced and aligned that it eliminates all the power-killing, tire-destroying sideways, a car that is designed and built for Service with Economy.

It's a "Made in Canada" Car that surely is a wonder to drive, and we'd just like to have the opportunity of taking you for a trial run, anywhere you say, as long as you say, as HARD as you say. Come in today.

SIXTH EPISODE

The Railroad Monopoly

By JAMES OPPENHEIM,
 Author of "The Beloved" and
 "Songs For the New Age"

not far from New Hartford Dunn was to be stationed, with instructions to open the draw and dash the special to destruction in the rocky stream below.

Tom and Ben suspected nothing. They were delighted when they found that the engineer and his fireman were ready to let them take their places in return for the \$500 Tom had offered.

The engineer led the way to an obscure spot and changed clothes with Tom, while his fireman gave up his own working togs to Ben. Just five minutes before the special was scheduled to pull out Tom and Ben took their places in the cab of the engine, waiting for the signal to pull out. And just before that signal was given Kitty Rockford and Dorothy dashed up.

"That's dad's car," she said. "Where is that special going?" she asked the nearest official, who smiled at her.

"Boston, Miss Kitty," he said. "Good!" cried Kitty. "Come on, Dorothy. It's just what we want."

There was no reason for stopping her. None of the station officials knew anything of Rockford's devilish plan. And so Kitty and Dorothy climbed aboard, and a moment later the signal to start was given. Rockford and Stone, sitting in Rockford's office, chuckled as they saw it pull out.

But five minutes later Rockford's chuckling was stopped abruptly, for a note that Kitty had hastily scribbled was brought to him. It informed him that his daughter was on the train that was doomed by his own act. As

ers, and the fight that followed was brief. Soon all the thugs wanted was to escape, and one of them wriggled free and sprang to the engine. He called to the other, and they went off in the engine. But they did not go far, for Dunn was waiting. He did his work well. The special crashed through the open draw, and the thugs met the fate they deserved.

Even as the crash of the wreck sounded in their ears another engine appeared. From it sprang Rockford, whose relief when he saw Kitty knew no bounds. He turned in a moment to Tom Larnigan.

"I can help you, and I will!" he said earnestly. "I have sworn to reform myself, and I will work with you to compel others to do so."

SEVENTH EPISODE

America Saved From War

By Mrs. WILSON WOODROW
 Author of "The Black Pearl," "Sally Salt" and "The Silver Butterfly"

BRUCE LARNIGAN, slowly recovering from the effects of the adventure on the wheat schooner that had so nearly cost him his life, began to take a more active interest in the war of extermination against "The Fifteen," the Graft Syndicate that had murdered his father. During his illness his brother Tom, who had been his rescuer, had pursued the work Bruce had sworn to finish, but Tom, willing as he was, was limited in his power.

"As district attorney here, Tom," he said as he lay in bed, "I was hampered by the limits of my authority. My jurisdiction didn't go beyond my own county, you see. At the same time I hated to give up my official position, and I would never have done it if I hadn't had something in mind that would take its place."

"What was that?" asked Tom.

"An authority that has no limits—that gives me equally great powers in New York and Seattle, Florida and Dakota! The authority of a state, even,

der taking of the syndicate. And it chanced that Dorothy overheard part of the talk of the plan for the destruction of the warship. With Dorothy at the time as her guest was Kitty Rockford, the daughter of the railway magnate, whom Tom and his friend, Ben Travers, had won from his allegiance to Stone.

"Kitty," said Dorothy, "we've got to interfere here. Your friend, Tom Larnigan, is in danger!"

"Oh!" said Kitty. "Do you really think there's any danger?"

"I do. And I've an idea as to how we can make sure too. I told you about my experience with Dunn? He has an office, you know. I think I can contrive a note that will get you work there as a stenographer. If you find anything out write a note and drop it from the window. I will be watching below and will get it. Are you game?"

"Yes. I'm a good enough stenographer to pass muster. I took a course once just for fun."

There had proved to be no difficulty about getting Kitty into Dunn's office. And at last Kitty heard something that sounded important. By listening in she discovered that a certain telephone call for Dunn was from Stanford Stone, and she managed to overhear Dunn's end of the conversation, though it proved impossible to hear what Stone said.

"The best chance is 63 Pell street—hop joint," was what Dunn said.

Kitty could not guess the meaning of this. But she wrote down what she

"The best place is 63 Pell street—hop joint," Dunn said.

had heard and dropped the note to Dorothy. Dorothy was also mystified, but she decided to take a chance and sent an unsigned note to Tom advising him to see what there was to be discovered at the hop joint at the address given by Dunn.

What Dunn had actually told Stone was the address of the place where Bill Bean, the eccentric and half mad inventor, was usually to be found. It was a hang out of his, it was explained.

SEVEN YEAR TO

Nothing Helped Him Until
 "FRUIT-A-TIVES"

ALBERT VARNE

Buckingham, Que., May
 For seven years, I suffer from Severe Headaches and I had belching gas from the bitter stuff would come in my mouth after eating, while at nausea and vomiting, and Constipation. I went to several and wrote to a specialist in without benefit. I tried many but nothing did me good. My friend advised "Fruit-a-tives" this grand fruit medicine. It did me well. I am grateful to "Fruit-a-tives", and to everyone who can help me with Constipation and Bad Stomach, "Fruit-a-tives", and you will.

ALBERT V

50c. a box, 6 for \$2.50, trial At dealers or sent postpaid. Price by Fruit-a-tives Limited.

"I can help you, and I will!" said Rockford earnestly.

he read it has face turned a ghastly color, and he slumped forward in his chair for a moment. Then he turned furiously on Stone.

"This is your doing, you murderer!" he cried.

He flung the note at Stone. "I'll try to save them!" he cried. "But whatever happens I'm done with you! I'll have no more dealings with you or any of the grafters who are in with you! I'll be an honest man again!"

He flew to send orders stopping the special and ordered out another special to follow. But he had no hope. There was no way, he was sure, of stopping the doomed train. The only chance was for Dunn to fail, and that chance, as Rockford knew only too well, was of the slightest. Dunn was not the sort to fail when success depended upon his own efforts and when he knew, as he did now, the price of failure.

What Rockford, however, had not allowed for was that Tom Larnigan had a plan of his own. And very soon after the special had pulled out and while it was still a mile from the bridge where Dunn waited Tom stopped the train.

"Come on," he said to Ben. "This is as good a time as any for our little talk with President Rockford."

But in the private car when they went back they found not Rockford, but the two girls—two astonished girls, moreover.

"Are we all alone on this train? I've been ringing and ringing, and there seems to be no porter," said Kitty indignantly.

But Dorothy at that moment recognized Tom Larnigan.

"So you're safe!" she cried. "I was so afraid they had hurt you, as they did Bruce."

And then there were explanations. Tom seized upon the main fact.

"I believe this was a trap!" he cried. "Get off the train while Travers and I look to see if anything is wrong."

Kitty resented what seemed to be a reflection on her father, but there was something compelling about Tom, and she obeyed. And then while Tom and Ben looked for evidences of a plot Dorothy explained many things to Kitty until she was interrupted by a hoarse cry of triumph.

"Got you this time, missy!" cried one of the thugs from whom her timely meeting with Kitty had enabled her to escape.

The two thugs had been obliged to walk the ties and had come just at this moment. But they reckoned without Tom and Ben. They heard Dorothy's scream, and the next instant they appeared and attacked the two thugs. The surprise helped Dorothy's rescu-

that gives me equally great powers in New York and Seattle, Florida and Dakota! The authority of a state, even, is limited—the authority of the Federal government is not!"

"Oh!" said Tom, startled. "You'd been fussing with Washington?"

"Decidedly so! It was all arranged and would have gone through long ago if I hadn't been hurt. I was to be made a special investigator or examiner, with the secret service fund and the secret service itself at my disposal. You see, I had gone into the whole business very fully with the President, and he agreed with me that the criminal operations of these great trusts constituted a terrible menace to the country. So I have arranged for you to receive the appointment that would have gone to me. You will have the official paper to-morrow—and your first task is to see what is being done by J. Brooks Carney."

"The head of the munitions trust?"

"Exactly. At Washington they are convinced that he is determined to drag this country into the European war. You can imagine what that would mean to his trust—orders of a tremendous importance."

"I'll do my best to scuttle him, Bruce! Now that I've got you within reach. I want to hold conversation with you when it's necessary to get your advice, I'm much less afraid of the rotten crew than I was!"

Bruce and Tom had hoped to keep Tom's appointment to the Federal service a secret, but they had known, too, that the Graft Syndicate was so well served by spies that there was little chance of success in this. And so it proved, for Carney himself, the man immediately affected, knew of the facts almost as soon as Tom himself. He went at once to Stanford Stone, the real head of the Fifteen—although neither Bruce nor Tom was aware of Stone's connection with the enemy.

"Here's bad news!" said Carney, when he had told Stone. "It seems to me it's more imperative than ever that we should get rid of this man Larnigan. He was bad enough before—you can guess how dangerous he will be with the whole power of the Federal government behind him!"

"Yes," said Stone, frowning. "And he should be kept out of the way especially just now—since it would be a frightful thing if our present plan were revealed! That would be a blow from which we'd find it almost impossible to recover."

"You mean our plan to blow up the interned warship?"

"Exactly! You know, Carney, how important it is that we should get into this war."

"And war means orders that would bring us a prosperity such as the world has never seen," said Carney. "There's only one thing—I don't trust this man Bean."

"We'll have Dunn watch him. Dunn has fallen down pretty badly against the Larnigan brothers, but I have found him useful enough in the past."

The conspiracy was widespread. Roger Maxwell, the head of the insurance trust and the father of Dorothy Maxwell, the girl whom both Bruce Larnigan and Stanford Stone loved, was concerned in it—not so much because he was likely to be of use as because Stone in order to increase his hold on Dorothy saw to it that Maxwell should be involved in every disgraceful un-

was a hang out of his, it was explained.

Stone and Carney meanwhile had seen Bean and concluded certain arrangements with him. He had invented a wireless transmitter of extraordinary power, so diminutive that it was capable of being carried in a waistcoat pocket.

"It looks good to me," said Stone when Bean at Carney's request had explained the principle of his invention. "I think it's safe to try it out to-night, Carney."

"You understand?" asked Carney. "We want you to give us a convincing demonstration. If it is satisfactory we stand prepared to pay you \$200,000 in yearly installments of \$50,000 for the rights to your invention."

"I'd do anything for that," said the Bean.

"Then give me two of your prepared magnets," said Carney, "and tonight at 8 o'clock go to a certain dock—I have written down the location for you—and set your current to work."

"Why at the dock?" asked Bean. "I could do it from here."

"Because you are to wait for a signal; something might go wrong with our plans. From the dock you will see a small boat. Three flashes of an electric torch will tell you to go ahead."

"All right," said Bean.

Carney believed in doing things himself; he took no chances with helpers who might fail him. Therefore he prepared two packages of explosives with a good deal of care, attaching to their fulminating caps by means of a fine wire the magnets Bean had given him. One of these packages he left with Mrs. Larnigan, Bruce's mother. He understood that Tom was to return home a little before 8 o'clock and asked her to give him the package as soon as he returned. This, entirely unsuspecting, she promised to do. The other package Carney meant to fasten to the stern of the interned warship as she lay at her anchorage.

Bean had obtained some money in advance upon his promise neither to drink nor to visit a hop joint until he had completed his work. But he could not resist the temptation, and by the

merest chance he went to his favorite resort, the one to which Tom had been advised to go.

Once in the joint, Bean grew boastful and displayed his money. This was too much for the other habitués of the place, and in a moment they fell upon him, meaning to rob him and if necessary kill him. It was in the midst of this struggle that Tom appeared. On general principles he went to Bean's aid, and it proved easy for him to beat off the drug weakened wretches who were attacking Bean.

Filled with gratitude, Bean left the place with Tom. And to show his gratitude Bean took Tom home with him and showed him his invention.

"I'll make you my assistant," he declared grandiloquently, and Tom, laughing, accepted the offer.

"We've got a big job on tonight," said Bean importantly. "You stick by me. Come on. It's time we were starting."

On the way, despite Tom's protests and quite forgetting his promises, Bean insisted on making numerous stops at saloons. He grew more and more exhilarated, and at last he sent by messenger a note to Stanford

"You mean our plan to blow up the interned warship?"

Stone. Tom did not know whether he would have given much, but so, to read the note, which—

"I'm on my way to the chance of my getting a new assistant to look after a bully fellow called Tom Larnigan."

Stone was almost frantic to read this note. Carney was on his way to do his part of the job. There was no way of getting in touch with him. And so he got to the telephone, urging him to send men to kill Tom Larnigan at the dock where he was to be with him. And so he got to the telephone, urging him to send men to kill Tom Larnigan at the dock where he was to be with him. And so he got to the telephone, urging him to send men to kill Tom Larnigan at the dock where he was to be with him.

"Get Tom Larnigan!" "Have him killed. Do what is necessary. Take any risk you like."

Meanwhile Tom and Ben reached the dock, and now Bean with questions, just as Bean would be willing in his state to tell the truth. This was the case, and Tom, filled with horror, learned of the dreadful

Tom thought fast. And he suddenly lunged for Bean. In a single moment, with Bean resisting, the inventor's hands were forced. And at once out in the air was a blinding flash—a terrific explosion. Carney in his boat, the explosives, had been pieces. The death he had planned for others had come to him.

And just then, too, the Dunn's office appeared, and he flung him into the water. Dorothy Maxwell had arrived having been warned by Rockford, and she sprang over the side, while Ben Travers, the miscreants who would have stopped her.

So the situation was saved. Country was spared from the which Stone and Carney had planned it.

MUSIC IN THE BALKANS.

A Player Who Startled His Hearers
and Unnerved Himself.

People will tell you in the Balkans that a gypsy camp is to be avoided; yet I used to halt them with pleasure. They added to the wildness and savagery of the nature about us. One day several miles from Uskup our horses raised their heads and listened to something we could not hear. At first we thought they were smelling human blood, but we came to the conclusion that something different caused their interest since no tremors of fear were passing through them. Reining them in, we listened, but, hearing nothing, started to ride on. After awhile a sound like a faint moaning of a torrent came to us. The effect on our horses was very peculiar. They seemed to have forgotten their fatigue and were sidling along in a way that made me nervous.

Finally we made out that it was weird strains of music that reached us. "We are nearing a gypsy camp," my brother said, with relief. "Some one is playing with more fire than usual."

Within sight of the camp the music came to us in its full beauty or its full horror, I do not know which. Since then I have heard many great masters play, but such music as that I have never heard. It was heavenly; it was hellish. Our horses were as much affected as we. They pranced as if they were steeds of great mettle instead of poor, scrawny Balkan ponies. As for me, I began to dream of things unheard, unknown, only dreamable.

Sitting on a wagon, a youth was hanging over his violin, playing—playing like mad. Presently, without interrupting his music, he sprang from the wagon and paced back and forth, still playing torrentially. We sat fascinated both by the player and his playing, trying all the time to quiet our horses.

At last the music seemed spent. The boy let his violin fall to the ground, where he, too, threw himself, and the music was succeeded by heart breaking sobbing. His weeping, like his music, was as torrential as a storm. Like it, it ceased when it had reached its climax.

THIS WASP HATES SPIDERS.

He Kills and Buries Them and Lays an Egg in Each Grave.

Just to show that he's sanitary, also that he's looking out for the future generation, the South African wasp always buries his prey after he kills it. He stabs a spider with his poisonous dart, digs a hole in the sand and buries the dead spider with an egg.

When the egg hatches the young wasp has a dead spider to nibble at until he gets big enough to hunt food for himself. Thus the wasp looks out for his children before they're hatched. He's a member of the family which scientists have named the pompilus.

Spiders are his favorite victims. He will pursue the spiders which live on the ground and paralyze them with his poisonous sting. Even the spiders which build webs are not safe from his attack. He will fight his way through the web until he reaches the center, where he will grab the spider and hurry away to bury it.

CASTORIA

THE CENTAUR COMPANY, NEW YORK CITY.

SHAKESPEARE WAS SHREWD.

Poet Was an Excellent Business Man,
but Fond of Litigation.

One reason may be given for Shakespeare not publishing his plays, and we have reason to think it was of a kind to appeal to him. There was no copyright, and to publish the plays was to lessen their financial value to his company. This "gentle Will," this "sweetest Shakespeare," this "Swan of Avon," was an admirable man of business. If we had only the records of the law courts, in fact, we might not be able to think so very well of him. He had a keenness for litigation which he seems to have inherited from his father. As a taxpayer he was slow, if not positively evasive. He was apparently negligent of a debt contracted by his wife. Like many men of property, he evaded the restrictions against brewing malt liquor for his private use, being in his way a moonshiner.

Liberal in giving aid and lending money to his friends in need, he was strict in collecting debts. At about the time he wrote the final version of "Hamlet" he sued the village another

ace asking to see him. He was admitted and in the greatest agitation said:

"Your majesty must abdicate."
"Very well," says the king. "In favor of my grandson."

"No, unconditionally," says the young and self elected mouthpiece of public opinion.

"Would you believe it? Of all who were congregated around the royal person Piscatory alone said: 'Go down and head your troops. Fight for your crown and your dynasty.' He was overruled, and they all marched out of the palace except the Duchesse d'Orleans, her children and the Duc de Nemours."

"Being Musical."

What is called "being musical" cannot be passed on to some one else or to something else. You cannot be musical vicariously—through another person, through so many thousand dollars, through civic pride, through any other of the many means we employ. Being musical does not necessarily lie in performing music. It is rather a state of being which every individual who can hear is entitled by nature to attain to

our plan to blow up the injured warship?"

center, where he will grab the spider and hurry away to bury it.

The pompilus is so dreided and feared that the spider has learned to distinguish him by the hum of his wings. If it's a fly buzzing around the spider waits in his web until he has caught his prey. But if he hears the hum of the wasp's wings the spider will drop from his web and scoot away to any hiding place he can find.

Pure Logic.

Bad men cannot exist without good men. Goodness and badness being relative terms, if there were no good men there could not possibly be any one with whom to compare the bad men. Consequently the bad men would be to all intents and purposes nonexistent. Or, in other words, if all men were bad there would be no good men to look down upon them, and as they would not look down upon themselves and consider themselves bad they would be, for all practical and logical purposes, good.

Sarcastic.

In a New Zealand town one of the municipal candidates, a Scotsman, had received a present of a huge Scottish thistle, which at the moment happened to be lying on the table of his committee room.

A friend entering withdrew suddenly, with the remark: "I beg your pardon. I did not know that you were at luncheon."—London Tit-Bits.

The Judge's White Gloves.

In the olden days judges were forbidden to wear gloves on the bench for fear of bribes being dropped into them. If there were no cases to be tried, however, there was no opportunity for bribing, and the sheriffs might give the judge a pair of gloves; hence the custom of presenting a judge with a pair of white gloves when he has no cases to try at an assizes.

Mother's Care.

"You think that your daughter is too young to marry, madam, but you yourself were married very early."

"That's just it. You see I want to prevent my daughter from being a mother-in-law too young."

Horrible Thought.

Burroughs—I know a man who looks so much like you that one could hardly tell you apart.

Lenders—You haven't paid him that five I lent you three months ago, have you?

Early Habit.

"The manager claims to have discovered his star actress working in a laundry."

"That would account for the way she mangles her past."—Baltimore American.

Making Peace.

"Your wife and your mother-in-law are looking for you."

"Do you think they are working together, or can I see my wife first and cook up a separate treaty?"

time he wrote the final version of "Hamlet" he sued the village apothecary at Stratford to recover a small loan, and while he was at work on the world tragedy of "Antony and Cleopatra" he engaged in litigation that brought him in conflict with the village blacksmith, a state of affairs that Emerson relates with something akin to horror. He conspired with his father to secure from the conniving Herald's college a shady coat of arms and the right to subscribe himself "gent." and, while apparently not actively aiding an attempt to inclose Stratford common lands in defiance of the rights of the people, he at best remained strictly neutral toward the project.

Careless as he seems to have been as to his fame as a dramatist, he was in business by no means above current standards of conduct. One gathers that the chief interest of his later years was to live at ease as a gentleman and provide well for his family. It is related on pretty good authority that he died of "a fever" after "a merry meeting" at Stratford with his old friend Ben Jonson and the poet Drayton. But it is not unlikely that the true cause of his fever was not drink, but the insanitary condition of the street in which he lived.

LOST BY LACK OF NERVE.

Louis Philippe Was Wanting When the Crisis Came.

Baroness Bonde wrote in her diary the following account of the abdication of Louis Philippe of France on the day of that remarkable occurrence:

"An aid-de-camp of the minister of war who was in the king's cabinet when he abdicated gave me a detailed account of this most signal piece of cowardice. He had reviewed the troops in the Carrousel on horseback, highly rouged, when a cry was raised, 'Vive les faubourgs!' No one had any orders; no one gave any. The mob rushed forward, shouting, 'Vive la garde nationale—vivent les troupes!' and shook hands with the outposts.

"The king retreated precipitately with his sons, and a sublieutenant of the national guard rushed into the pal-

hear is entitled by nature to attain to in a greater or less degree.—Atlantic.

Shell of the Snail.

The snail's horny shell serves to protect its soft body against numerous foes. Slugs are simply snails that live a retired life and consequently need no covering at all. The shell of the snail is built up from lime in the plants on which it feeds, and they are never found on soil which contains no lime.

A Tightwad.

"I understand that Mr. Pinchpenny has been operated on for appendicitis," remarked Miss Cayenne.

"Yes, it's the first time any one was known to get anything out of him."

"And even then they had to chloroform him to get that."

Once Is Enough.

"Jiggs says that if he ever marries again he's going to have 'obey' eliminated from the ceremony."

"What's the trouble?"

"No trouble, but he says that they can't fool him more than once."

A Difference Between Differences.

A man may disagree with his neighbor on religion and be merely a fool. If it be a political difference, then it is clear he is a scoundrel.

Very Particular.

Mistress (engaging servant)—I hope you have nice print dresses, and I expect you always to wear caps. Maggie—Yes, mum; I'm very particular to wear caps. I should not like to be taken for one of the family.

The Essentials.

"Is he a typical American?"

"Yes; he likes baseball, has a motor-car, owes a mortgage, pays alimony and thinks the moving pictures have grand opera beaten a mile."

Will Never Know.

Seymour—It is better to be right than president. Ashley—How do you know? You've never been either and never

We Believe the Maxwell is Great Motor Car Value on the Market

BUT our opinion would not be of any particular importance to you if it did not coincide with the facts. We only want you to look the matter over carefully. Then we absolutely know that you will agree with us.

In the first place there is the remarkable Maxwell engine. No other cylinder motor of its size has more "pep" or go to it regardless of the price of the car it drives. It will climb hills on high gear in a manner that astonishes you. It is quiet and works day in and day out with a sound, business-like hum that is good to hear.

Any engineer will compliment the design of the chassis. And those who are not engineers cannot fail to note its simplicity and staunch construction. As for what it is made of, we can truthfully say that better material cannot be bought.

The operation of the car is simplicity itself—the brakes are powerful, the springs are long and flexible—the axles are strong and the steering apparatus, like the rest of the chassis, is built to stand the most severe service the car may ever have to face, wherever or however it is used.

Then if you consider looks important, and most people do, you will find a more attractive car than the Maxwell at anywhere near the price.

And it comes to you fully equipped with all the attachments you

And a more attractive car than at any other place near the price.
 And it comes to you fully equipped with all the attachments you ever want or need; electric starter and lights, demountable rims, one man self-ventilating, rain-vision windshield, etc. All for \$850 (five passenger touring car) or \$830 (two passenger roadster).

We know you can't beat it.

Touring Car \$850

Roadster \$830

Making the Little Farm Pay

By C. C. BOWSFIELD

Experiences are rapidly multiplying to show the broadening of farm programs and the high earning power of land when it is properly managed.

There are many products which pay \$200 to \$500 an acre under skillful cultivation, and it becomes vitally necessary for those who are restricted to a few acres to devote themselves to money making crops. The fact is easily demonstrated that the more profitable commodities are almost as easily raised as those which pay the least.

B. V. Egbert of Mercer county, Pa., has made a great success of two products which can be depended on to return something between \$100 and \$300 an acre above the cost of labor. One of these is tomatoes and the other berries, both of which naturally belong in a little farm scheme. Both are reasonably prolific and sure, and ready sale at fair prices and are not beyond ordinary skill. Berries may be made to utilize odd places, unoccupied corners or rough spots around the premises.

Mr. Egbert's method of pruning tomatoes is unusual and unique. He allows the plant to make four leaves, then clips off the top. If a cluster of buds has formed it makes no difference; they are not saved, as they seldom develop into perfect fruit. The effect of this topping is to cause four strong side branches to form, one in

the axil of each leaf. On these branches a fruit cluster will develop in the

RED RASPBERRIES.

axil of each third leaf. Three clusters are allowed to form on each branch; then the end of the branch is clipped off. This provides for twelve clusters of fruit, which Mr. Egbert finds to be all that the plant can mature. Side shoots which spring from the branches later are pinched off, leaving only the main framework of the plant and the leaves growing on it. He gains much by keeping the fruit off the ground.

The important point is the effect this method of training has in hastening the ripening of the fruit. Mr. Egbert claims that while a plant allowed to mature its first cluster undisturbed may ripen a single fruit sooner than a plant pruned in this way the pruned plant will be far ahead in the race of producing fruit to go on the market and that by this means he reaps a

handsome reward for his care in the higher price obtained for the crop.

He also holds some ideas of his own regarding intensive methods of growing red raspberries and blackberries. He is not content to grow these plants by the ordinary method of hedgerows and self supporting plants, but insists on keeping the plants in hills and not allowing more than six canes to each hill. He objects to a spreading, self supporting bush because it interferes with cultivation, and he believes that thorough cultivation throughout the growing and ripening period of the fruit as a means of maintaining the moisture supply is a matter of the utmost importance. He ties the canes to a trellis made of two wires strung on posts. The canes are allowed to grow tall, being left six feet in height after being cut back. He finds that the young canes do not develop strong fruit buds until they get above the fruiting canes. In order to overcome this trouble and get well developed buds without too great height he bends the fruiting canes over and ties them to the wires, thus giving the young shoots a free field in which to develop.

Mr. Egbert estimates it costs him as much to grow one acre by this method as it would to grow two in the ordinary way; but he is confident that the greater yields more than repay the extra cost. He is after cheaper bushels and feels that this is the way he gets them. The thorough cultivation which he gives enables the plants to carry a crop through a drought that cuts off the crop entirely on bushes as ordinarily grown. His method also makes one acre yield as much as many growers obtain from two.

Danger from late spring frosts may be lessened by planting orchards or small fruit plantations on elevated sides. Severe frosts may occur in the

lowland near this elevation without doing any injury located higher up. Somewhat of five to ten feet of unobstructed valley near where the current of cold down and escape, similar to a creek or river, prevent danger from frosts.

GENERAL FARM

It does not pay to give vessels to any farm animal no exception.

A manure spreader is a thing on the farm, but the is in direct proportion to is used.

Much valuable manure poorly arranged stables is possible to save or recover.

After a young sow brought litter it will be best if she a rest before breeding again. Litter is usually the hardest system of the dam, reason, if for no other, is given a rest.

One thing that operates success in horse breeding fact that the owners do not stallions, as is the universal the old country. Farmers tomed to making their best hogs lay on fat. This is making money for their many farmers seem to the same practice should a horse, especially the stallion wrong. The stallion near his own good and the progeny. He can be made maker in the field and in this way he will develop muscle instead of fat as better health and sire for foals.

WHY HUSBANDS LEAVE.

What Statistics Show About Wife De-
serters.

Why do so many husbands run
away?

A statistician connected with the bu-
reau of public welfare has been trying
to answer the question.

After investigating thousands of
cases of desertions he finds that the
husband's action can usually be ascrib-

WHOOING COUGH

SPASMIC CROUP ASTHMA COUGHS
BRONCHITIS CATARRH COLDS

Vapo-Cresolene
Est. 1879

A simple, safe and effective treatment avoiding
drugs. Vaporized Cresolene stops the paroxysms
of Whooping Cough and relieves Spasmodic
Croup at once. It is a boon to sufferers from
Asthma. The air carrying the antiseptic vapor, in-
haled with every breath,
makes breathing easy;
soothes the sore throat
and stops the cough,
assuring restful nights.
It is invaluable to mothers
with young children.

FOR THE COOK.

How to Fry a Large Chicken the
Easiest Possible Way.

Prepare in the usual way for fry-
ing; have fat one-eighth inch deep in
pan smoking hot; place the chicken
in the pan and cover; reduce gas
flame until the chicken fries very
slowly, turning each piece until rich
brown. Pour one cupful of hot water
into the pan and let the chicken con-
tinue to cook with cover on until all
the water has cooked out. Lift the
chicken on to a dish and make a
brown gravy. This is intended for
grown chicken, but not old fowl.

An Up-to-Date Garden.

To make the garden livable it
must be furnished. Nature may pro-
vide the setting and the color
scheme, but man's ingenuity is re-
quired to supply the seats and sum-
mer houses, the bird baths and pools,
the pergolas and sun dials, or as
many of these things as it may seem
expedient and wise to have. Garden
furniture is less expensive than it
used to be—less expensive and bet-
ter. Moreover, there is a great va-
riety. Good rustic pieces may be
made at home, or, time and skill be-
ing lacking, they may be bought. So
also may delightful old English seats
and tables, while pergolas and arbors
of artistic design and good workman-
ship may be obtained ready made
and set up in the garden with but
very little labor. In fact, every sort
of garden furniture from summer
house down to bird houses is now on
the market. There are even artistic
bird baths and pedestals made of
wood and much cheaper than those
of marble or even of composition.

Of course cement has come to take
a prominent place in the garden and
is used in making pedestals for sun
dials, bird baths, and pools, as well
as for benches and seats. To many
minds no garden has really been
brought to date until it has been
equipped with a pool in which water
lilies may be grown, with the glisten-
ing sides of goldfish flashing among
them. Such pools need not be at
all expensive and are not difficult to
construct when good Portland ce-
ment is the material used.

New Method of Broom-making.

A new system of broom manufac-
ture contemplates the repeated use
of the stock by supplying a new head
as the older one is worn out. It also
contemplates a reversible method of
assembling the corn by which service
is secured from both ends.

The broom proper consists of a

Too Much of a Target.
Brown—How old you feel, Jones,
when the burglar had you covered with
his revolver—pretty small, eh? Jones—
Small! Great Scott, no! I felt as big
as the side of a house—

Competition.
"When I was first married my wife
used to talk, talk, all the time."
"Has she given it up?"
"She had to. We've got two grown
up daughters now, you know."

Highly Excitable.
"Brown is rather an excitable chap
isn't he?"
"I should say he is! Why, he almost
got a stroke of apoplexy the other
night while watching a chess tourna-
ment."

A Mean Hint.
He—Women ought to be so removed
from ordinary outside life that men
can still look on them as angels.
She—How would the men like them
to be recording angels?

Coffee In Java.
It is said that nowhere in the world
is coffee, the drink, worse than in Java,
where coffee, the bean, is supposed to
be at its very best. Javanese distill
coffee essence of extreme strength, bot-
tle it and pour a few drops into a cup
of hot water when they wish refresh-
ment.—Argonaut.

The Other Way.
"Then you don't want to leave foot-
prints upon the sands of time?"
"Nix," answered the politician guard-
edly. "All I want is to cover up my
tracks."

cases of desertions he finds that the
husband's action can usually be ascrib-
ed to one of the following causes:

Ill health and peevishness of the
wife.

Slouchiness of the wife either in her
own person or in her housekeeping
methods or both.

The wife's habit of nagging or gos-
siping.

Dislike for children on the wife's
part.

This statistician found that the
strongest incentive to reconciliation in
cases of family discord is almost in-
variably the child. He also found that
very few wives are deserted who are—

Physically well and mentally cheer-
ful.

Able to contribute to the family in-
come either by outside labor or by
frugality in home management.

Affectionate and home loving.
Sympathetic and considerate of their
husbands.

The very interesting and valuable
statistics which he collected prove that
native American husbands are more
prone to desert their wives than are
the foreign born.

They also show that married life is
the happiest when husband and wife
are nearly alike in age, nationality, re-
ligion, moral standards, temperament,
health and physical strength.

SUDDEN DEATH

Caused by Disease of the Kidneys.

The close connection which exists
between the heart and the kidneys is
well known nowadays. As soon as
kidneys are diseased, arterial tension is
increased and the heart functions are
attacked. When the kidneys no longer
pour forth waste, uremic poisoning
occurs and the person dies, and the
cause is often given as heart disease, or
disease of brain or lungs.

It is a good insurance against such a
risk to send 10 cents for a large trial
package of "Anuric"—the latest dis-
covery of Dr. Pierce. Also send a
sample of your water. This will be
examined without charge by expert
chemists at Dr. Pierce's Invalids' Hotel,
Buffalo, N. Y. When you suffer from
backache, frequent or scanty urine,
rheumatic pains here or there, or that
constant tired, worn-out feeling, it's
time to write Dr. Pierce, describe your
symptoms and get his medical opinion
without charge—absolutely free. This
"Anuric" of Doctor Pierce's is found
to be 37 times more active than lithia,
for it dissolves uric acid in the system
as hot water does sugar.

Simply ask for Dr. Pierce's Anuric
Tablets. There can be no imitation.
Every package of "Anuric" is sure to
be Dr. Pierce's. You will find the signa-
ture on the package just as you do on
Dr. Pierce's Golden Medical Discovery
for blood and stomach.

WORRY, DESPONDENCY.

Kidney Disease is suspected by medical
men when patients complain of backache
or suffer with irregular urination, dis-
turbed, too frequent, scanty or painful
passage. The general symptoms are rheu-
matic pains or neuralgia, headaches,
dizzy spells, irritability, despondency,
weakness and general misery. Worry
is a frequent cause and sometimes a
symptom of kidney disease. Thousands
have testified to immediate relief from
these symptoms after using Dr. Pierce's
Anuric Tablets.

assembling the corn by which service
is secured from both ends.

The broom proper consists of a
suitably shaped bundle of hairs or
splints of equal length. These are
clamped together centrally of their
lengths by means of a strong band,
which forms a component part of the
broom when vended, and the coarser
ends of the hairs or splints are all
preferably at one end of the broom
and the finer ends at the other end
thereof. The ends of the band are
secured to the respective arms of the
yoke by means of screws engaged in
the flattened ends thereof, whereby
the broom member may be revolved
end for end when desired to bring
either the coarse or the fine end into
operative position.

Weights and Measures.

One-half kitchen cupful equals one
gill.
One kitchen cupful equals one-half
pint, or two gills.
Four kitchen cupfuls equal one
quart.
Two cupfuls of granulated sugar
equal one pound.
Two and one-half cupfuls of pow-
dered sugar equal one pound.
One heaping tablespoonful of but-
ter equals one ounce.
One heaping tablespoonful of
sugar equals two ounces, or one-
quarter cupful.
One cupful of butter equals one-
half pound.
Four cupfuls of flour (one heaping
quart) equals one pound.
Eight round tablespoonfuls of dry
material equal one cupful.
Sixteen tablespoonfuls of liquid
equal one cupful.

A Garden Hint.

Cuttings from many plants grow-
ing in the window garden will root
readily at this season, and in conserva-
tories and greenhouses cuttings
should be made freely now.

Clean, sharp sand is the best for
rooting cuttings generally, though
geranium cuttings can be made and
potted up in thumb pots. The cut-
tings should be made just below a
bud, trimming off all the foliage ex-
cept a leaf or two at the top of the
cutting, and the top half of these
leaves may be clipped off.

Be careful to have the sand firm
about the base of the cutting, set-
ting it half its length below the sur-
face. Water thoroughly and shade
from the sun, not allowing the soil to
become dry.

What Women Can Do.

There are certain things women
can do on the lighter and more fancy
side of life on the land; but for a
life on the land it must be such as
will earn a living throughout the
twelve months of the year, and this
is restrictive. In emergency women
patriotically inclined could render
service by becoming good milkers, in
tree grafting—a much bigger busi-
ness in the future than many con-
ceive—and so on; but they must do
it in earnest, and those who will sub-
mit to it should do it at once so they
may be trained by the time they are
most needed. The idea that three
weeks' training in farm work makes
an efficient worker must go by the
board; yet it was seriously entertain-
ed a few months ago.

Mrs. B. Denison is quite ill again. E. Robinson is spending a few weeks in the west visiting friends.

Visitors:—Mr. and Mrs. Massey at Rev. Mr. Cook's; Mr. and Mrs. J. Weese and Mr. and Mrs. K. Weese at C. Arnold's; Miss H. Thompson at Miss Fitzpatrick's; Mr. and Mrs. A. Ramsay at W. Doidger's; Mrs. Hawley at G. Valteau's; Mrs. Comley and daughter at Mrs. Imess'.

The Artist and His Work.

The great artists, like the great heroes, have always done whatever came to hand.

Michelangelo grumbled and said he was a sculptor when Julius II. set him to paint, but he painted the roof of the Sistine chapel. Shakespeare chafed at the popularity of the fool in the drama of his time and then produced the fool in "Lear."

If either of them had waited for perfect conditions and an inspiration untrammelled by circumstances he would have done nothing. They produced masterpieces because they made the best of things as they were. And this is the business of the artist in life.—London Times.

conduct in the field. I have the honor to be, sir

Your obedient servant,
D. HAIG,
 General Commander-in-Chief
 The British forces in France.

Among the names in the list appear the following:

Lt.-Col. (temporary Brigadier-General) P. G. Twining, M.V.O., C.M.G., R. E.

Capt. C. F. Carson, Adjt.
 Capt. W. M. Miller.

General Twining is a brother-in-law of the Daly brothers.

Capt. Carson is a son of Mr. Robt. Carson, Kingston, and a nephew of Mrs. Casey. Piety Hill.

Capt. Miller has been working for the past two months on the front where the present drive is taking place.

3,000,000 Servian and Belgian Refugees in France

A general appeal is to be made shortly to the public through the medium of the Churches, which should bring a generous response. It comes from the Toronto Headquarters of the Secours National—The National French Relief Society—for funds to provide and send necessities, especially food, to the 3,000,000 Servian and Belgian Refugees, who have fled for protection and sustenance to our noble ally, France.

In spite of the necessity for strict economy which the thrifty French people practise so well, they have welcomed and cared for these unfortunate refugees at a great personal sacrifice.

It seems a fitting time for a friendly nation whose sons are fighting side by side with theirs to offer a gift to the French people; for the 14th of July is the anniversary of the birth of the French Republic, it is their national holiday, corresponding to our own Dominion day.

It is hoped that Napanee will respond generously to the general appeal which is being sent out to the towns throughout Canada; and that we are enjoying peace and plenty in our own land, may thus show our sympathy for a brave people, whose country is invaded, and whose towns and homes are devastated by the ruthless Huns, but who nevertheless welcomed and are sheltering their still more unfortunate neighbors.

Contributions will be gladly received by the clergy of the town.

Examination Successes.

At the recent Toronto Conservatory Examinations the following candidates, all pupils of Ernest Wheatley, Mus., Bac, passed:—

A. T. C. M. — Miss Hilda Ackerill. Miss S. Walton.

Intermediate—Miss Francis Leonard, Miss Phoebe Smith.

Junior—Miss Marion Chapman.

LA TENA'S WILD ANIMAL

ONE OF THE BEST THAT I HIBITED HERE—ACTS OF ING AND SENSATIONAL ACTER.

(Niagara Falls Journal, W May 31st, 1916.)

La Tena's Shows that ex to-day, has the reputation among the best and cleanest in Niagara county.

A very meritorious stre was held this morning, th traversing a goodly portic town and proving an excell timent for the show.

A big crowd attended the show.

There are three rings in tent and as each is occupied class artists, equal to those shows, the eye of the behol busy taking in all the stunts. The trained eleph bears, seals, leopards and t the best ever seen here.

One of the features was jumping of two of the best l ing horses in the world. F ridden by Miss Etta Myers cord jump of seven feet inches, and Major McKin by Miss Jess Nicholas, his ing seven feet and two inch

The greatest thriller of was the dare-devil act of ales, who walked to the tent on a wire down whic falling to the ground whil on his head.

The trapeze work was o and the tumbling and conto could not be excellel.

The elephants proved a gr in going through many feats.

The Gothard trio gave a itable exhibition on tight Miss Morrall does the same wire.

There was a whole retinuc that were really funny.

Capt. Pickard's trained claimed to be the gratee wild animal act in the worl easily proved his right to tl

There were many other were all excellent numbers.

At the close of the big sh exhibition of Wild West ric throwing, rope spinning, ri ing horses and many other the wild and wooly West is

One thing chiefly notical respectability of the circ employes conducting them very perfectly decorous a manner. The tents and o ment are all in first-class the costumes and other pa spick and span, adding v to the appearance of the c stock is well taken care o animals also given the best all of which makes the sh one.

The shows are billed for July 20th, 1916.
